Description

The Pasternack series of rectangular waveguide bulkhead flange mount adapters are offered to cover frequency range of 18 to 110 GHz in seven waveguide bands. The transitions are used for waveguide interface in panel mount equipment. A hole is made in the panel and the adapter is mounted to the panel with screws. Once mounted, waveguides with UG-387/U-Mod flanges can be attached to the adapter on both sides of the bulkhead adapter to allow a signal path through the panel. The PEWAD5000 is a bulkhead adapter for WR-10 waveguides with UG-387/U-Mod flanges.
