Connectivity has a profound and dramatic impact on the lives of people throughout the world. Because of advancements in technology, **our** lives are more convenient, more secure, more enjoyable and richer than ever. The speed of data enables communication in the **most** remote areas so people can reach all corners of the globe, allows for **important** defense and security, and facilitates space exploration. But technology doesn't just happen. It starts in the mind with ideas, making **connections** never considered in ways that nobody dreamed possible. Seeing the future in ways previously unimagined **is** the act of innovation and it begins with people—the inventors, the dreamers, the pioneers and the engineers—enriching the lives of billions. At Radiall, we have one single, solitary mission; Empower the people that enrich our lives. Enable their innovation by providing reliability and durability. Give them useful information and provide them with valuable guidance when determining the best course for success. We don't invent the future, we enable it. We inspire innovation, we embrace challenges, we challenge the conventional and we collaborate **with** you to succeed. At Radiall, we're proud to say – Our most important connection is with **you**.

Company Profile

Our Most Important Connection is with You™

Radiall is a global leader in the design, development and manufacturing of leading edge interconnect solutions. Dedicated to understanding its customers' needs since 1952, Radiall has earned the reputation of being "the best of the best" in engineering ingenuity by providing a constant flow of creative system solutions serving the defense, telecommunications, aerospace, instrumentation, automotive, industrial, medical and broadcast markets.

Best Value-added Services

Collaboration: We work closely with your engineers to understand your business, your technical needs, and your budgetary requirements.

Wide Product Range: We manage our product lines through the entire lifecycle in order to offer you a wide selection of standard products at an affordable cost.

Custom Products: We can tailor products to specific equipment and application needs.

Global Presence: We're everywhere you need us, with worldwide sales, engineering support, R&D in North America, Europe, and Asia, and manufacturing facilities strategically located in the United States, Mexico, France, India, and China.

Responsive Support and Service: From the design stage, to planning and post-installation support, we're with you at every step, whether you need sales support or engineering expertise.

On-time Delivery: We support your logistical needs so you get the products when and where you need them.

Warranty: We proudly stand behind our products.

Certifications and Environmental

Radiall is ISO 9001: 2008 certified and dedicated to continuous improvement programs that have resulted in also being AS9100, TS16949 and ISO 14001 certified. In addition, Radiall is committed to investing in its people, future technologies and the environment, such as being RoHS (Restriction of Hazardous Substances) and REACH (Registration, Evaluation, Authorization and Restriction of Chemical substances) compliant.

The Best End-to-End Interconnect Solutions

We offer an extensive range of solutions that supports the most demanding signal transmission applications. 4G wireless infrastructure, active array radars, IED's detection, electrical wiring in aircrafts, soldier tactical radios, in-vehicle communications networks, and magnetic resonance imaging systems are just a few of the complex applications that we support.

- RF coaxial connectors
- Fiber optic connectors and transceivers
- Coaxial and fiber optic cable assemblies and harnesses
- High frequency microwave components
- Coaxial switches, including the smallest and most reliable SPDT relay
- Multipin rectangular connectors
- Rack and panel connectors
- Antennas for tactical networks, aerospace and instrumentation

- Micro-machining

A Global Range to Meet Your Needs

RF Coaxial Connectors

Radiall proudly offers the widest range of RF Coaxial Connectors in the Industry with over 13,000 part numbers and 55 product series including AEP® Mil QPL connectors. These precision-made components are a significant part of our heritage and essential to who we are.

RF & Microwave Switches

All Radiall switches provide exceptional reliability and performance. A unique modular and patented design of the actuator and transmission link enables Radiall to guarantee operation up to 10 million cycles with excellent repeatability, while reducing delivery times.

Microwave Components

Radiall has a wide range of coaxial devices, including terminations, attenuators, and couplers using standard interfaces from low to high power. Our state of the art techniques enable us to produce microwave components for use in commercial, military, and space applications.

Antennas

Radiall provides highly reliable antenna solutions for industrial and military applications. Our solutions include Line-Of-Sight tactical communications, vehicular mount, GPS, telemetry, and mesh networks. For optimum performance requirements, Radiall offers custom antenna solutions and support.

Multipin Connectors

Radiall has an unmatched range of rack and panel connectors and the most innovative modular and tool-less connectors used in harnesses and equipment connections. Our modern designs combine light weight, high performance levels and user friendly features to simplify even the most complex connections.

RF Cable Assemblies

Radiall has an extensive range of cable assemblies with outstanding electrical performance, low loss, and high frequency. Our range includes flexible, semi rigid and handformable cable assemblies. Our TestPro™ range meets the stringent requirements needed for test and lab applications.

Space Qualified

Industry leaders across the globe recognize the Radiall brand for quality, reliability, and performance. Our Space Qualified passive product offering includes a wide range of coaxial connectors, cable assemblies, microwave components, and switches with a frequency range up to Ka band.

D-Lightsys®

Active Optical Solutions Optimized by D-Lightsys® for harsh environments. From optical transceivers to the world's smallest parallel optics, D-Lightsys® technologies support the most challenging applications, including harsh environments and avionics applications.

Harnesses

The combination of design and manufacturing of RF and microwave cables as well as multipin connectors (EPX, ARINC 404 and 600) allows Radiall to be a specialist of harnesses for onboard or land equipment or communications systems. All types of contacts can be used and mixed such as signal, power, RF, quadrax, fiber optic...

Fiber Optics

Radiall designs and supports high performance end-to-end Optical Interconnect solutions. Our offer includes standard interfaces, terminations, connectors, harnesses and custom design optical links and subsystems. The flexibility and high quality of our product range supports harsh environments and demanding applications.

Packaging

Shipping information

Unless otherwise stated, shipping lead times may vary depending on the location and time zone in which products are stocked or manufactured. The packaging defines the container of first level of a product. Radiall offers five types of standard packaging.

Labeling

Labeling has an important role in packaging. It has to supply all the necessary information in a clear and concise way. All of our packages are identified with the Radiall name, part number, lot number and quantity.

Blister tray

DEDICATED TO LARGER CONNECTORS • ABILITY TO STACK SEVERAL TRAYS WITHOUT DAMAGING THE CONNECTORS

- This specific packaging is suitable for large or fragile connectors. Products are vertically arranged in custom trays, providing protection against shock and making it easy to quickly count quantity.
- They are covered by an anti-dust lid or wrapped with a plastic film.
- This packaging is available for specific types of connectors when standard packaging might cause damage during shipping.

Tape and reel

- Products are arranged in an anti-static polyester blister tape covered with a ribbon defender. The set is then rolled up on a polyester reel which can receive 100, 500, 1800 or 3000 parts depending on the model.
- This packaging, dedicated to surface mount components is compatible with all pick and place automatic machines. It is CEI 286-3 compliant.

Bulk

BULK BAG OR BOX OF 100 PIECES (CONNECTOR BODY + CENTER FERRULE + CENTER CONTACT)

- The multiple bag or box contains 20, 50, or 100 of each component part in separate bags.

Packaging

Unit packaging

- All connectors can be ordered in unit bags. It is an individual tear-proof polyethylene bag, which holds the connector and all of the component parts for that connector.
- Unit packaging must be specified when ordering: add « W » at the end of the part number (except for adapters and specific products).

Pre-cut unit bag (no cutting tool required to open)

Blister bulk pack

FOR MULTI-PART PRODUCTS • EASY TO OPEN • IDEAL FOR IN-THE-FIELD ASSEMBLY

- This bulk packaging is suitable for small connectors. Radiall offers four types of blister bulk pack depending on the configuration of the product and the number of pieces (10, 20, 50, or 100).

Three compartments blister bulk pack of 20 pieces

Shipping box

Radiall has designed multiple boxes for optimum packaging and protection. These boxes are available in various optimized sizes.

- Eco friendly design labeled tape makes it easy to identify Radiall goods. Printing is minimized in order to limit the use of toxic substances. All boxes can be recycled (except for the adhesive).
- Each product part number has a dedicated carton box adapted to the size of its packaging.
- All individual boxes are typically placed in size 20L shipping boxes (40x30x20 cm).

Performance, not promises

Applied Engineering Products (AEP) was established in 1972 as a company which strongly believes in quality products and on-time delivery. A custom-built facility established in the downtown area of New Haven CT, USA was home to this highly successful company, which ranked as the best of the US independent manufacturers of sub-miniature coaxial connectors used in the RF and Microwave Industry.

Today, AEP is a Radiall product brand commercialized alongside the core Radiall RF product lines. AEP connectors and cable assemblies are designed and qualified by our dedicated staff in New Haven, CT. The most popular AEP product range is the "7000" family, which includes multiple designs in SSMB, SSMC and SSLB connector series. AEP is also recognized for the reliability of its waterproof coaxial connectors, 100% immersion tested before shipping. With over 100 AEP QPL MIL-PRF-39012 active part numbers, Radiall is well positioned to serve the needs of the military and defense radio equipment manufacturers.

In this catalog, AEP connector part numbers are listed together with the Radiall line. The AEP codification for connectors is explained below. Most AEP connector data sheets are available for download at www.radiall.com. Click on "Product Finder", then "RF Coaxial Connectors" and select AEP.

Ingress Protection Rating

First digit (protection against solid objects)

0 - No protection

1 - Protected against solid objects over 50mm (e.g. accidental touch by hands)

2 - Protected against solid objects over 12mm (e.g. Fingers)

3 - Protected against solid objects over 2.5mm (e.g. tools and wires)

4 - Protected against solid objects over 1mm (E.g. tools, wires and small wires)

5 - Protected against dust - limited ingress (No harmful deposit)

6 - Totally protected against dust

Second digit (protection against liquids)

0 - No protection

1 - Protected against vertically falling drops of water

2 - Protected against direct sprays up to 15° from the vertical

3 - Protected against direct sprays up to 60° from the vertical

4 - Protected against sprays from all directions limited ingress permitted

5 - Protected against low pressure jets of water from all directions - limited ingress permitted

6 - Protected against strong jets of water (e.g. for use on shipdecks) - limited ingress permitted

7 - Protected against the effects of temporary immersion 15cm to 1m. Duration of test: 30 min.

8 - Protected against long periods of immersion under pressure

Ingress Protection Rating

The rating number refers to a specific test described by international standard (IEC60529 for example) specifying and classifying the degree of protection from dust and water for the equipment.

The first digit represents the protection level against solid object and the second against liquids.

Example on our N clamp type connector: IP67= totally protected against dust and against temporary immersion between 15cm and 1m.

Note

Do not mix up IP rating with hermeticity level.

Hermeticity sealing is required for microwave modules to provide long term reliability.

A measure of hermeticity is the leak rate, which is expressed in atmosphere cc/second, based on the Helium Fine Leak Test (MIL-std 803 or JEDIC - JESD22-A109-A).

A traditional hermeticity value must be 5×10^{-8} atm-cc/s Helium or better.

Plating Properties

Radiall offers a comprehensive range of in-house electroplating for standard or specific uses and conditions. Plating performance is key in several characteristics of the connector such as: Durability, Wear Behavior, Contact Resistance, Electrical Conductivity, Magnetic Properties, Corrosion Behavior, Solderability, and Appearance. Radiall operates its plating facility since 1977 in compliance with the latest environmental standards.

Radiall Plating Know-How

Available coatings are Copper, Nickel, Nickel phosphorous, Tin, Gold, Palladium, white Bronze, Chromium, Silver, Nickel PTFE, and passivation of stainless steel. Base materials on which we apply coating are Copper alloys, Stainless steel, Ferronickel, Zink die cast, Plastic, and Aluminium.

Radiall Proprietary Plating

NPGR (Nickel Phosphorous Gold Radiall)

This plating consists of a thin layer of gold on top of a layer of electrolytic nickel-phosphorous. With the addition of Phosphorous (>10%), the Ni becomes non magnetic and offers a low intermodulation level. The combination of gold and NiP provides an excellent protection against corrosion, and an ultra low friction coefficient allowing up to 10,000 mating cycles. The thin gold layer allows for good wetability. NPGR is recommended for center and outer contacts, PCB/SMT connector bodies, and for telecom/datacom applications. It is not recommended, however, for solder joints in harsh environment, high temperature applications. NPGR is a cost reduction alternative to standard gold plating compliant with AMS QQN 290 and MiL DTL 45204.

N2PGR (New Nickel Phosphorous Gold Radiall)

This plating offers similar properties as NPGR with the following advantages: improved mechanical resistance and reliability of solder joints in high temperature environment and better corrosion resistance. This is achieved due to a new Nickel barrier between NiP and gold. N2PGR is compliant with AMS QQN 290 and MiL DTL 45204.

BBR (Bright Bronze Radiall)

BBR is a copper-tin-zinc base alloy plating, applicable on all copper substrates which looks like bright white silver. It was designed to replace Ni plating and offers better conductivity while being non allergic and non magnetic. Intermodulation generated by BBR is as low as that with silver plating. BBR connectors are solderable using mildly activated flux. Corrosion and tarnishing resistance are among the most important environmental features of this plating, together with excellent wearing resistance and mechanical characteristics. BBR is recommended for outer contacts and conductor bodies in cable and panel connectors' applications.

Standard Plating

Gold

Gold plating is preferred for its great electrical signal transmission properties. It also provides excellent oxidation resistance (even in polluted environment) and mating durability (wear resistant). Gold over copper is mainly used for center and outer contacts with thickness of 0.8 to 2.5µm or more. Gold over Nickel is often used for PCB connector bodies to improve solderability. Gold is compliant with MiL DTL 45204.

Nickel

This plating has been widely used on connector bodies and outer conductors for its mechanical and environmental properties. But it is often replaced by alternative platings because of the risk of allergy. Now Nickel is commonly used as an underlayer for gold or other noble metals. The Ni layer acts as a diffusion barrier, to prevent the migration of base material atoms (usually copper) to the top coating. But Nickel is magnetic thus not suitable for applications requiring a low IM level. Where Nickel plating is used for PCB connectors with solder legs, it is recommended to choose selective tin plating or hot dipping on the legs before soldering. Nickel is compliant with AMS QQN 290.

Silver

The main advantage of Silver is its excellent electrical and thermal conductivity, featuring the lowest contact resistance. Silver plated connectors are particularly suitable for applications where low intermodulation is required. It is also recommended for connector parts that need soldering or brazing. Silver plating is often used as a cheaper replacement for gold plating, but Silver tarnishes over time, creating an oxide layer on the surface which affects its electrical properties. Silver is often combined with BBR to avoid tarnishing. Silver is compliant with ASTM B700.

Nickel PTFE

Nickel PTFE plating can be specified for connectors used in harsh environment for military applications, due to its friction, corrosion and wear resistance. Nickel PTFE is compliant with AMS 2454.

Manual plating production line

Automatic plating production line

Summary table

	Solderability	Electrical performance	Corrosion resistance	Friction, mating durability	IM, magnetic properties	Hardness	Tarnishing	Cost

Introduction

RADIALL has developed a new MML series to address the market demand for smaller microminiature coaxial connectors for applications such as cell relay, WiFi access points, GPS and other mobile terminals. There are three types of plugs with mated heights of H2.5, H2.0 and H1.5, as well as two types of vertical PCB receptacles with electrical performance up to 6 GHz.

FEATURES

- Two vertical PCB receptacles
 - MML H2.5 and MML H2.0
 - MML H1.5
- Space saving
 - Three mated heights 2.5 mm, 2.0 mm, 1.5 mm
 - PCB patterns 3.08 mm x 3 mm for H2.5 and H2.0, 2 mm x 2 mm for H1.5
- DC - 6GHz, typical VSWR 1.35 max
- Cable assemblies are offered with three high performance cables: 1.33 mm for MML H2.5, 1.13 mm for MML H2.0, 0.81 mm for MML H1.5

APPLICATIONS

- Handhelds/GPS/WLAN
- GSM/CDMA/WCDMA/TD-SCDMA cards

Characteristics

	Values / Remarks
--	------------------

ELECTRICAL CHARACTERISTICS

Nominal impedance	50Ω
Frequency range	DC - 6 GHz
Typical VSWR	1.35 max
Contact resistance <ul style="list-style-type: none"> • Center contact • Outer contact 	25 mΩ 15 mΩ
Insulation resistance	500 MΩ min
Voltage rating <ul style="list-style-type: none"> • H2.5 and H2 • H1.5 	200 Vrms 150 Vrms
Withstanding voltage <ul style="list-style-type: none"> • H2.5 and H2 • H1.5 	300 Vrms 200 Vrms
Mechanical durability	30 cycles
Center contact axial force	0.15 N
RoHS	Compliant
Temperature range	-40 / +90°C
Humidity	96 hours at temperature of 40°C and humidity of 95%
Corrosion (salt spray)	5% salt water solution, 48 hours

MATERIALS AND PLATING

	Materials	Platings
Connector bodies	Phosphor Bronze	Gold
Female center contact		
Male center contact	Brass

Introduction

	MMS	MMT
50Ω	DC - 6 GHz	DC - 8 GHz
75Ω	DC - 1 GHz	

GENERAL

- Low profile coaxial connectors
- Surface-mount receptacle (SMT)
- Snap-on mating
- High RF performance
- 360° cable rotation

APPLICATIONS

- Automotive
- Satellite reception terminals (GPS...)
- Instrumentation
- Wireless datacom networks
- Automated payment systems
- Video communications
- Other general electronics

Radiall introduced MMS and MMT connectors, dedicated to Surface Mount Technology (SMT), in the 1990s.

MMS and MMT series were the first coaxial connectors truly designed for SMT applications and adapted for automatic pick and place machines.

• **360° cable rotation**

The **MMS** and **MMT** snap-on mating system ensures a correct positive connection each time and all connectors (plugs + receptacles) have a design which allows a 360° rotation of the pair when mated.

• **MMS vs MMT**

MMS and **MMT** connectors are dedicated to similar applications. The choice between these 2 series will be driven by mating life cycle required for the application. MMS is dedicated to applications which require only few mating/unmating cycles. MMT provide stronger retention force while allowing more manipulation.

	MMS	MMT
Durability (mating cycle)	50	500
Frequency range	50Ω DC - 6 GHz 75Ω DC - 1 GHz	50Ω DC - 8 GHz 75Ω DC - 1 GHz
Mated height	5.2 mm	6.8 mm

Characteristics

	Test standard	Values / Remarks
--	---------------	------------------

ELECTRICAL CHARACTERISTICS

		50Ω	75Ω
Frequency range		DC - 6 GHz	DC - 1 GHz
Typical V.S.W.R. (mated pair)	IEC 1169-1	1.05 at 1 GHz 1.15 at 2.5 GHz 1.35 at 6 GHz	
Insertion loss	IEC 1169-1	0.2 dB at 2 GHz	
RF leakage (mated pair)	MIL STD 1344 method 3008	-50 dB at 500 MHz -45 dB at 1 GHz -40 dB at 2 GHz	
Outer contact resistance	NF-C 93050 (I = 40 mA peak)	5 mΩ max	
Center contact resistance	NF-C 93050 (I = 40 mA peak)	15 mΩ max	
Insulation resistance	IEC 1169-1	500 MΩ min (under 250 V RMS)	
Working voltage		50 V RMS	
Testing voltage (V RMS)	IEC 1169-1	Ø 1 mm: 250 ; Ø 2 mm: 500	
Maximum admissible power		40 W at 1 GHz / 20°C / V.S.W.R. = 1	

MECHANICAL CHARACTERISTICS

Durability	IEC 1169-1	50 matings
Force to engage	IEC 1169-1	7 N avg
Force to disengage	IEC 1169-1	5.5 N avg
Shocks (drop test)	IEC 68-2-27	50 g/11 ms ; 3 shocks / axis / way
Random vibrations	General Motors spec.	Sine waves 5 to 1000 Hz 3 to 30g - 1 H/axis
Bumps (mechanical shocks)	IEC 68-2-29	25 g/6 ms 1000 bumps / axis / way
Cable retention force	IEC 1169-1	Ø 1 mm: 20 N ; Ø 2 mm: 35 N
Solderability	IEC 68-2-54	Passed

ENVIRONMENTAL CHARACTERISTICS

Temperature range		-40°C / +90°C
Climatic cycles	GAM T 13	48 H at 70°C - 24 H at 40°C / 93% -36 H at -25°C

⁽¹⁾ Both cable assemblies are equipped with a straight MMS plug with a sliding interface to allow 500 matings and a SMA connector.

EXTRACTION TOOL

Materials and finish: black anodized aluminium
The anodization allows the electric insulation and protects from the oxidation.

Series	Part number
MMS	R282 868 100
MMT	R282 868 040

Procedure for use of SMT Nozzle for Receptacle

Ø OF NOZZLE > 1.2 mm
Suction with the central contact hole.

Ø OF NOZZLE < 1.2 mm
Suction with insulator.

ASPIRATION AREA

Introduction

50 Ω

DC - 6 GHz

GENERAL

- Subminiature coaxial connectors
- Push-pull snap-on mating
- Complies with specification CECC 22000

APPLICATIONS

- Wireless telecom
- PCMCIA cards
- RF test ports
- Medical

MMCX series is dedicated for wire to PCB connection where low space above the PCB is available (less than 2.1 mm). MMCX is adapted to high volume applications and Pick & Place manufacturing processes.

Introduction

50Ω - 75Ω	DC - 6 GHz
-----------	------------

GENERAL

- Subminiature coaxial connectors
- Push-pull snap-on mating
- Complies with specification CECC 22220
- CEI standard 1169-36

APPLICATIONS

50Ω models

- Wireless communications
- Civil and military radio-telecommunication equipment

75Ω models

- Video communication
- Television broadcasting

The MCX series utilizes the SMB series electrical line and features a particularly simple, compact and robust interface. The MCX series is 30 % smaller than the SMB. The MCX series helps to **miniaturize equipment**. It lowers wiring connection costs through its full crimp and solder crimp versions as the center contact of the straight models can be either crimped or soldered. It optimizes PCB layouts with its range of models for PCBs including surface mount and press-fit receptacles.

Introduction

	SMP	SMP-COM	SMPM
50Ω	DC - 40 GHz	DC - 12.4 GHz	DC - 65 GHz

GENERAL

- Small, lightweight connectors
- Snap-in, suitable for blindmate applications
- Excellent vibration and shock performances
- Allows axial and radial misalignment

APPLICATIONS

- Active array antenna
- Satellite
- Airborne / Ship / Ground radar
- Communication equipment
- High speed electro-optical devices
- Board to board applications

SMP series

Radiall SMP series meets MIL STD 348, figure 326 interface standard, and DESC specifications 94007 & 94008. They are intermateable with GPO® (Gilbert Engineering Inc.).

There are 3 levels of retention (applicable to the male connectors when ordering) which provide different levels of force required to connect and disconnect the connectors:

- Full detent for a positive locking with a maximum retention
- Limited detent for a positive locking with a medium retention
- Smooth bore for the lowest retention (slide connection)

Radiall also offers multiport solutions with SMP interface allowing better alignment control while mating multiple connectors. The multiport concept increases density and allows the operator to save installation time by connecting several SMP connectors in one operation.

SMP-COM

SMP-COM is an economically priced alternative fully intermateable with standard SMP connectors. It has been optimized to operate up to 12.4 GHz meeting the needs of telecom applications. Compared to SMP, which is primarily made of stainless steel material, SMP-COM uses brass material.

SMPM

30% smaller than SMP, SMPM connectors are designed for very high frequency applications where space and package density are a necessity.

The Radiall SMPM series meets MIL STD 348, figure 328 interface standard. They are intermateable with GPPPO® (Gilbert Engineering Inc.).

There are 2 levels of retention (applicable to the male connectors when ordering):

- Full detent for a positive locking with a maximum retention
- Smooth bore for a lower retention but higher durability (mating cycles)

Unique visual identification groove: in order to easily identify full detent connectors versus smooth bore, Radiall SMPM full detent receptacles feature a groove on the outer body. This method of identification is an innovation by Radiall.

All 2.4 mm adapters feature identical electrical lengths.

Panel drilling

PANEL CUT OUT

P01	
B	1.8 - 1.9 (.071 - .075)
C	7.11 - 7.21 (.0280 - .284)

P02	
a	3.36 - 3.38
b	3.03 - 3.15
c	2.27 - 2.29
d	1.63 - 1.73
e	0.79 - 0.83
f	4.52 - 4.56
g	0.13 - 0.17
h	0.28 - 0.38
j	3.15 - 3.19

Panel drilling

1. Degrease and clean connector and box.
2. Solder the connector on the panel. We advise using SnAg4 Cu0.5 and a low residue flux. Preheating at 100°C is recommended. Take care not to exceed 260°C during soldering operation.
3. Solder the pin on the track. We advise using SnAg4 Cu0.5 and a low residue flux. Preheating at 100°C is recommended for ceramic substrate. Take care not to exceed 260°C during soldering operation.

P03	
a	5.31 - 5.33
b	1.09 - 1.12

1. Degrease and clean connector and box
2. Screw-on the connector on the panel
3. Solder the pin on the track

Introduction

SMP-LOCK™, the Ultimate Secure Connection

Radiall has expanded its broad range of SMP products with SMP-LOCK™ connectors featuring a robust locking mechanism, which dramatically increases the retention force of the interface and prevents accidental disconnection.

They have been specially designed for harsh environments and to withstand more severe vibration and drop tests.

SMP-LOCK™ connectors are suitable for cable-to-cable or cable-to-module interconnections inside equipment subject to harsh mechanical stress such as airborne radars, avionics, satellites, missile, UAV and UGV applications.

Features & benefits

- Excellent electrical performances combined with robust locking feature
- Two step connection, low insertion force
- Audible click indicates that plug is locked, eliminating accidental disconnections
- Locking sleeve provides greater retention force more than 450 N with RG-405 cable
- SMP interface has a high frequency DC-40 GHz
- Plug equipped with EMI ring offers improved RF leakage performance -92dB at 18 GHz
- SMP-LOCK™ uses limited detent interface for lower connect/disconnect forces, less mechanical stress and a longer life cycle
- Extraction tool available for easy unmating in high density panels
- IP67 rating when mated

Introduction

50Ω

DC - 12.4 GHz

GENERAL

- Snap-on mating
- Microminiature coaxial connectors
- Robust
- Surface mount receptacles
- Fully compatible with automated pick and place machines

APPLICATIONS

- Board to board applications
- Base station
- High density packaging

MMBX™ connector series is particularly suitable for board to board connection in telecommunication systems. MMBX™ connectors allow a quick connection in a minimum space requirement. Frequency range is DC to 12.4 GHz. SMT connectors are totally compatible with pick and place machines.

• **Space saving**

Its small size is a main advantage for applications requiring board to board distance less than 7mm.

• **Recommended use**

Receptacles and in-series adapters can be either sold separately or with the adapter already inserted in the receptacle. In this case, assembly time will be reduced and you will be sure that the in-series adapter is properly inserted.

- Retention between receptacle and in-series adapter is ensured by the asymmetrical design of the adapter:
- Snap side: for board to board application, it allows all in-series adapters to remain on the same board during disassembly.
 - Slide side: it allows quick and easy connections with large axial and radial misalignment tolerance.

Introduction

Board-to-Board solutions

The Best Systems

Radiall's engineers work with your engineers, allowing us to develop the best competitively priced misalignment RF coaxial interconnect solutions on the market today.

The Best Choices

Radiall offers more board to board choices with four different product groups and ten connector series, that can address the most demanding wireless telecom applications required for the new generation of infrastructure compact equipment. From base stations to repeaters and even handheld and GPS devices, we have a tailored connector solution for you, including the new SMP-MAX, SMP-Spring, IMP-Spring and other large, limited and no misalignment solutions.

SMP-MAX

Get the best for less with the new SMP-MAX large misalignment solution. Its patented impedance matching insulator is optimized for a larger operating gap between connectors making it easier for engineers to handle a board-to-board distance tolerance of at least .078" (2.0 mm) without a spring, which is 300% more than the standard SMP. It features a 3° minimum tilt (radial travel) and it has an operating frequency range of DC-6 GHz and a 1.2 max VSWR guaranteed at DC-3 GHz.

SMP-MAX Receptacle

SMP-MAX Adapter

Spring-loaded Connectors

Radiall's one connector IMP-Spring and three connector SMP-Spring, MMBX-Spring, and BMR-Spring large misalignment spring-loaded series are the best for increased maximum distance tolerances. IMP-Spring is a cost effective, unique one connector solution that offers up to .023" (.6 mm) board to board distance tolerance with a tilt (radial travel) up to 4.5°. The new SMP-Spring and MMBX-Spring offer up to .078" (2 mm) board-to-board distance tolerance and a 4.5° tilt (radial travel). All spring-loaded solutions feature consistent VSWR and low RF leakage.

IMP-Spring and SMP-Spring

Limited Misalignment

Radiall's one connector IMP and three connector SMP and MMBX limited misalignment series are designed for applications requiring relatively precise distance tolerance of up to .023" (.6 mm) with a tilt (radial travel) of up to 4.5°.

IMP

No Misalignment

Radiall's MMT, MMS and MCX series are designed for applications requiring little or no distance tolerance between boards.

Introduction

50Ω	DC - 6 GHz
-----	------------

GENERAL

- Microminiature coaxial connectors
- Power up to 300 Watts
- Board to board distance misalignment of at least 0.078" (2.0 mm)
- Tilt (radial misalignment): 3° minimum
- 1.2 max VSWR at DC - 3 GHz

APPLICATIONS

- Broadcast
- RF components (filters, amplifiers,)
- Wireless communications

The cost-effective solution for maximum mechanical misalignment

Of the several RF connectors available for interconnections in wireless remote radio heads, repeaters, base stations, GPS devices, and similar applications, the board-to-board style connector is growing in popularity. The product line has evolved from accommodating limited misalignment to offering the widest tolerances available.

SMP-MAX was introduced by Radiall to provide larger misalignment tolerances than the early version board-to-board connectors like SMP or SMP-spring while offering lower cost.

Featuring an optimized interface, SMP-MAX can work up to 6 GHz board-to-board distance misalignment at least 2.0 mm and radial misalignment 3° minimum.

The SMP-MAX series offers 2 levels of retention provided by the receptacles:

- Slide-on, for the lowest retention
- Snap-on, for a positive locking with a retention

A complete SMP-MAX board-to-board system is made of 3 parts:

SMP-MAX Slide-on receptacle	SMP-MAX In series adapter	SMP-MAX Snap-on receptacle
		

Many other custom configurations are available. Larger distance misalignment and larger tilt versions are also available.

Characteristics

SECTION 4 TABLE OF CONTENTS

Introduction

The Coaxipack 2 series has been designed in accordance with the IEC 61076-4-104 (standard 2mm geometry system). Coaxipack 2 provides high density coaxial connectors aimed at high speed and space saving applications. The Coaxipack 2 series is available in 50Ω and 75Ω.

APPLICATIONS

50Ω RANGE

- Telecom / Datacom (Transmission equipment, Satellite Communication Systems, Base station)
- Medical
- Networking industry
- Instrumentation

75Ω RANGE

- High speed data network
- Digital Broadcast System (Routers, Switching and Control Systems, Monitoring and Signal Measurement, Encoders etc...)

FEATURES AND BENEFITS

Coaxipack 2 combines high performance miniature coaxial connectors with the convenience, compacity and cost effectiveness of 2mm metric systems.

FEATURES

- Excellent for coaxial signal transmission: low crosstalk, low signal distortion, high level of EMI/RFI shielding
- High speed performance: Minimum reflection and propagation delay, sub-nanosecond rise time capabilities
- Ruggedized for a variety environments: Industrial applications, humidity, shock, vibration...

BENEFITS

- Space savings on PCB, reduced PCB routing complexity and supplies adequate spacing for high speed routing.
- Stackable with other 2mm metric modules (ex: power, signal) from most manufacturers.
- Maximum flexibility in system architecture due to Coaxipack's modular design-system designers are able to upgrade designs and add new functions without having to adopt major changes in the hardware configuration.

Introduction

MODULE

- Radiall offers a large range of pre-assembled modules. The term "module" is used for Coaxipack 2 connector mounting on board configuration.
- One module combines a housing including one or more inserts. The number of inserts depends on the required configuration, up to 6 contacts.

- Depending on the part number, one insert is made of one or two coaxial contacts.

CABLE ASSEMBLIES

Radiall offers a standard kit including straight female insert and housing which fully complies with the IEC 61076-4-104.

TECHNOLOGY BREAKTHROUGH INNOVATION

- **Interface:** Robust guidance and mating tolerances with reinforced interface provides a perfect alignment without any risk of loss of contact.
 - Male: New chamfers on outer contact and new radius on center contact for improved guidance
 - Female: New chamfered and extended insulator prevents any misalignment in very high density applications
- **Packaging:** Improved design of packaging to secure the connectors and prevent any damage during the transportation or handling. All connectors are shipped in a tray for safety during transportation and an added convenience during the manufacturing process.

ORDERING GUIDE

- **Connector choice**
Radiall offers either ready to use modules (housing + inserts) or ca
- **Shielded connectors**
Additional choices with two ways of plating to improve the shielding level:
 - (1) Addition of metal plates to the plastic housing
 - (2) Metallization of the plastic housing

Characteristics

ELECTRICAL CHARACTERISTICS

Frequency range	DC-3 GHz (Optimized) - (Working range up to 6 GHz)	
Impedance	50Ω and 75Ω	
V.S.W.R mated pair for <ul style="list-style-type: none"> • PCB modules • Straight female - cable assembly • Straight male - cable assembly 	DC-1 GHz < 1.08 < 1.15 < 1.13	1-3 GHz < 1.12 < 1.30 < 1.20
Insertion loss mated pair	0.2 dB typical from 0 to 3 GHz	
RF leakage	-35 dB at 3 GHz	
Voltage rating	500 V	
Dielectric withstanding voltage	750 V	
Insulation resistance	≥ 5000 MΩ

Cable assembly

Each cable assembly consists of:

- One housing
- One cover
- One latch
- One or several inserts corresponding to customer's configuration

HOUSING Two types of housing for straight female cable assembly kit are offered:

Type 1: HOUSING FOR FEMALE INSERTS

Part number
R694 262 056

Straight inserts (see page 5-14)
for 50Ω: **R199 001 003** or **R199 001 023**
for 75Ω: **R199 001 053**

Type 2: HOUSING FOR FEMALE INSERTS WITH PRESS - IN FIXING STUD (for panel and PCB mounting)

Part number
R694 262 906

Straight inserts (see page 5-14)
for 50Ω: **R199 001 003** or **R199 001 023**
for 75Ω: **R199 001 053**

COVER (type 1 only)

SECTION 5 TABLE OF CONTENTS

Introduction

Radiall offers a complete range of switching connectors that consists of four families:

- Microminiature, Moebius, for high life cycle mobile applications
- Microminiature, MC-Card, for mobile applications
- Reverse polarity MCX
- Power, for infrastructure applications

Microminiature Moebius: Designed for life

We chose Moebius in reference to the Möbius strip, as the origin of the infinity symbol. It is a good illustration for the very high durability performance of the Moebius connector. The Moebius interface is designed to be used as an antenna connection for handheld and mobile computing devices. The switching connector provides high RF performance and it is extremely durable and reliable as a snap-on connection.

Microminiature MC-Card

The MC-Card series are micro miniature, 50Ω connectors that feature snap-on mating and a frequency range of –8 GHz. The MC-Card series was designed by Radiall in the 90s. With the success of the switching version, it made the MC-Card an excellent alternative to MMCX connectors for numerous wireless and telecom applications. In addition, the MC-Card series offers similar performance as the MMCX by featuring quick snap-on mating and unmating withstanding a minimum of 5,000 mating cycles.

The globally adopted switching connector version consists of a female edge card receptacle with an integrated switch for SMT assembly. It allows for automatic switching between two RF signal paths. This connector is mainly used for wireless PCMCIA-Cards or GPS devices to switch between the internal antenna and a higher-gain external antenna.

In addition to the standard MC-Card series, Radiall also offers a 3mm dia. MC-Card. With this version, wireless equipment can be differentiated and protected against wrong antenna connections.

Introduction

Reverse Polarity MCX

This switching connector is available in straight SMT version and can be placed anywhere on the PCB. Reverse polarity MCX connectors must be used to activate the switch function. It is not compatible with standard MCX.

Power switching connectors

RF power switching connectors are surface/edge mountable. It's a two in one solution replacing the existing standard RF switches by integrating the switch function into a connector. This solution provides a unique means of switching between two RF signal paths. The switch is mechanically activated by mating and unmating the connector.

MAIN ADVANTAGES

- Reliable
- Increases the density
- Excellent electrical and mechanical performance
- Cost savings
- Available in a right or left version
- Many interfaces available: N, TNC, SMA, QN, QMA and more

MAIN APPLICATIONS

- Telecom base station equipment
- RF power amplifiers

Characteristics

	Not mated	Mated
Operating temperature range	-40°C to + 110°C

Introduction

50Ω

DC - 4 GHz

GENERAL

- Subminiature coaxial connectors
- Snap-on coupling
- Plugs have female contacts
- Jacks have male contacts
- Low weight and reduced outline dimensions
- Captive contact (except contrary specification)

APPLICABLE STANDARDS

- SMB series MIL-C-39012
MIL-C-39012/67-72
- IEC 169-10
- CECC 22130
- BS 9210 N0007

APPLICATIONS

- Mobile communication systems
- Civil and military telecommunications
- Aeronautics
- Automotive

Introduction

SMB snap-on subminiature coaxial connectors provide a fast and reliable connection for high density packaging for applications up to 4 GHz.

Radiall offers a very large range of SMB connectors, including cable plugs and jacks with bulkhead and panel mount configurations, bulkhead and panel mount receptacles; through hole, SMT and edge card receptacles and in-series and between series adapters.

SMB series also features versions with lower mating forces than standard. Four types of interconnection mechanisms are available:

- **SMB: Standard** snap-on connection
The design permits quick engagement and disengagement.
- **SMB limited detent (SMB-A):** Snap-on connection with **low mating force**
The design permits quick engagement and disengagement, and is suitable for printed circuit boards. Radiall offers a range of PCB and bulkhead receptacles with female center contact. The SMB-A receptacles are completely intermateable with standard SMB jacks.
- **SMB slide-on (SUBGLIS):** Slide-on connection
The design is suitable for back plane and blind mate applications. In this case, we recommend the association of a mobile connector (floating jack / receptacle) with a fixed connector (panel plug / jack, receptacle). The SUBGLIS connectors are completely intermateable with standard SMB and SMB-A connectors and for that, they can be used for test applications.
- **SMB Lock:**
Plugs (with female center contact) have a coupling nut allowing a reliable lock-on connection (50 N min). This range allows a visual control of the locking system.

These four types of SMB connectors have the same electrical performances.

SMB LOCK

Introduction

Radiall introduces new **SMB LOCK** plugs with a 2-step connection system:

- 1 **Snap** the plug on the male connector (fig. 1)
- 2 **Lock** the couple by pushing down the coupling nut (fig. 2)

This new range

- Is **intermateable** with the standard **SMB** male connectors
- Benefits from a low intermodulation
- Replaces the standard **SMB** and screw-on connectors in all applications requiring:
 - A fast connection
 - A reliable lock-on connection
 - Long durability
- Possibility to visually control the locking system

- The connector allows a 360° cable rotation
- Coupling nut

The coupling nut is made with POM (halogen free). Its standard color is black.

Introduction

50Ω	DC - 10 GHz
-----	-------------

GENERAL

- Subminiature coaxial connectors
- Screw-on coupling
- Plugs have female contacts
- Jacks have male contacts
- Low weight
- Reduced outline dimensions

APPLICABLE STANDARDS

- MIL-C-39012

APPLICATIONS

- Civil and military telecommunications
- Aeronautics
- Missiles
- Edge mounting applications

Introduction

	BMA
50Ω	DC - 22 GHz

GENERAL

- Blind mate connector
- Slide-on coupling
- High frequency
- Float mount design allows large axial and radial misalignment

APPLICABLE STANDARDS

- MIL-STD-348 Fig. 321
- CEI 1169-33
- Compatible with OSP series

APPLICATIONS

- Airborne and ground radars
- Active electronically scanned array antennas
- Rack and panel telecommunication equipments
- Military microwave modules

Radiall's BMA series has been designed for applications where reliability, durability and performances at high frequency are essential. BMA is a blind mate connector widely used to interconnect microwave modules with multiple coaxial ports. Float mount connectors are recommended for multiple interconnects. Contact Radiall for mounting tolerances.

WIDE RANGE

The BMA product range consists of cable connectors for flexible cables, semi-rigid cables and SHF cables, floating bulkhead or flange mount, PCB receptacles, press mount receptacles, screw-on receptacles, hermetic receptacles, coaxial contacts for rectangular or circular multipin connectors and adapters.

NEW SPRING FINGERS OUTER CONTACT

In 2007, a new outer contact was designed and introduced on all BMA female connectors. The new spring fingers outer contact provides improved performances and stability at high frequency up to 22 GHz. Old BMA female part numbers are obsolete and have been replaced with new part numbers which are listed in this catalog.

Introduction

Radiall stainless steel SMA connectors have been designed for applications where reliability, durability, robustness and high frequency are critical.

• WIDE RANGE

The stainless steel SMA range offers cable connectors for both flexible or semi-rigid cables, panel and PCB mount receptacles, press mount, microstrip, universal, through hole pins and end launch connectors. In series adapters and between series adapters including PUSH-ON interface are also available.

All Radiall stainless steel SMA connectors can be mated with Radiall commercial (brass) SMA connectors.

• CONVENIENT 3-PIECE DESIGN ON MOST CONNECTORS FOR FLEXIBLE CABLES

- For straight models: single piece body + center contact + outer ferrule
- For right angle models: single piece body + cap + outer ferrule

• FAST AND RELIABLE CABLE ATTACHMENT

The cable connectors can be either fully crimped or soldered/crimped, offering full flexibility for high volume production with standard manual or pneumatic tooling: fast and reliable.

- The center contact can be either crimped or soldered
- The outer contact is attached to the cable by crimping a ferrule

• SIMPLE SNAP-IN CENTER CONTACT CAPTIVATION (FOR FULL CRIMP MODELS)

The relative position of the center contact into the interface is mechanically guaranteed by the snapping of the insulator inner shoulder into the groove of the center contact.

This design facilitates the captivation operation in contrast of other designs, requiring 2 insulators to provide contact retention.

• EXTENDED FREQUENCY SMA DC-27 GHz

Radiall offers an extended frequency SMA range allowing coaxial system operation up to 27 GHz. This series mates with the standard SMA series and maintains the same mechanical characteristics (part numbers ending with 700, 701 or 702).

• SOLDERLESS ATTACHMENT TO SEMI-RIGID CABLE

Radiall's SMA crimp connector series offers an exciting alternative for assembling SMA connectors to semi-rigid cable. The main advantages of these connectors are: time savings, repeatability and performance.

Introduction

• **SMA HERMETIC**

Hermetic connectors are required to maintain a pressurized or vacuum environment inside a micro-electronic package. Radiall offers 3 types of hermetic connectors:

1. Field replaceable hermetic receptacles with separate glass bead

(leakage rate below 10^{-8} atm.cm³/sec)

The hermeticity level is guaranteed by the glass bead soldered into the package. A large selection of glass beads is available from dia 0.3 to 0.5 mm. They are usually ordered separately from the receptacle. The receptacle can be removed (field replaceable) from the package for maintenance without any risk of leakage. The field replaceable receptacle is recommended when a high number of matings is required.

2. Hermetic receptacles with integrated glass bead

(leakage rate below 10^{-8} atm.cm³/sec)

The glass bead is already in place inside the receptacle, hermeticity is guaranteed by a solder joint between the receptacle and the package or with a metallic compression gasket. Screw-on receptacle with metallic compression gasket offers superior climatic resistance: -65°C +200°C.

3. Hermetic receptacles without glass bead

(leakage rate below 10^{-6} atm/cm³/sec)

A good hermeticity level is obtained with a metallic gasket at a cost advantage compared to glass beads.

50Ω	DC - 18 GHz
	DC - 27 GHz

GENERAL

- Sub-miniature coaxial connectors
- Screw-on coupling
- High RF performance
- 2 plating options:
 - passivated stainless steel
 - gold plated
- Wide hermetically sealed range
- Space qualified range of products
- SMA extended frequency 27 GHz

APPLICABLE STANDARDS

SOLDER TYPE FEMALE RECEPTACLE

Panel feedthrough receptacles feature an internal hermetic glass bead. A ring of solder between the receptacle body and the package will provide the hermeticity level.

Part number (Gold)	Connector body	Panel drilling	Contact type
R125 630 000	FN42 alloy		Cylindrical
R125 630 040	Stainless steel		

SCREW-ON TYPE FEMALE RECEPTACLE

Screw-on receptacles with integrated glass seal - the compression gasket will ensure the hermeticity between the receptacle and the package.

Part number (Gold)	Part number (Passivated)	Connector body	Panel drilling	Contact type
R125 609 000	R125 609 001	Stainless steel	P05	Cylindrical

Part number	Description
R282 341 012	Installation tool for jack receptacles R125 605 361 R125 605 371 R125 605 401 R125 609 000 R125 609 001 R125 609 010 R125 609 011 R125 609 070 R125 609 071

Field replaceable hermetic microstrip receptacle information

ELECTRICAL PERFORMANCES

V.S.W.R. to 18 GHz

Connector only	Seal only	Connector & seal
1.04 + 0.006F (GHz)	1.02 + 0.003F (GHz)	1.06 + 0.01F (GHz)

V.S.W.R. MEASUREMENT

Setting for V.S.W.R. measurement on field replaceable hermetic receptacle

a) Measurement with auxiliary contact-assembly drawing

- R280 469 000 (for pin DIA 0.30 mm)
- R280 469 010 (for pin DIA 0.46 mm)

b) Measurement without auxiliary contact-assembly drawing

Recommended value : L1 = 1.0 mm

The track width on ceramic defines the circuit impedance.

Field replaceable hermetic microstrip receptacle information

GLASS BEAD AND CONNECTOR ASSEMBLY INTO THE MICRO ELECTRONIC PACKAGE

GLASS BEAD

1. Adjust X by cutting the pin if necessary
2. Introduce the glass bead into its cavity
3. Place a ring of solder in the groove around the glass bead (a 0.3 mm wire dia. of solder is recommended)
4. Solder the pin (or optional socket) on the PCB trace inside the package

Note: there is not too much welding.

IMPORTANT: For maximum RF performances, the link track/pin must be as thin as possible.

Therefore, we advise to follow the A dimension rigorously, by soldering accurately the pin or the socket directly on the trace.

CONNECTOR RECEPTACLE

Place the "EMI" screening gasket in the groove of the receptacle (if applicable).

Introduce gently the receptacle on the glass bead pin, then screw the flange (use the appropriated tool for screw-in receptacle).

GLASS BEAD MOUNTING

The Radiall panel drilling on page 8-27 recommends an additional bore or chamfer machining on the outer edge of the glass bead housing. This additional machining allows to place a pre-form (solder stick Dia. 0.3 mm) before soldering.

After mounting, solder is flushing and allows the right positioning of the receptacle.

The EMI gasket efficiency is guaranteed.

Introduction

Radiall Commercial SMA connectors are specially designed for applications where low installed costs are of the most importance. They are easy, fast to assemble and reliable, and offer the perfect solution for high volume applications requiring high level performance such as in civil telecommunications, data communications or test and measurement.

- **Full compatibility:**

Commercial SMA connectors are fully compatible (interchangeable and intermateable) with all existing MIL standardized SMA connectors. They feature the same performance level except for mechanical characteristics (life: 100 matings and coupling nut torque: 60 Ncm).

The coupling nut of Commercial SMA connectors features a special design which is different from the standard SMA coupling nut as the tightening torque is reduced.

- **Wide range:**

The Commercial SMA series offers a wide range of solutions which are for every standard coaxial flexible or semi-rigid cable as well as PCB models with traditional through-hole pins or solder pads for SMT applications.

- **Simple snap-in axial captivation (for full crimp models):**

The relative position of the center contact into the interface is mechanically guaranteed by the snapping of the insulator inner shoulder into the groove of the center contact.

This design facilitates the captivation operation in contrast to other designs, requiring two insulators to provide contact retention.

It assures constant and perfect axial positioning of the center contact into the interface.

- **Space-saving size:**

Due to the captivation technique, these commercial SMA connectors are shorter than multi-piece body connectors.

- **Convenient 3-piece design:**

- For straight models: body + center contact + outer ferrule
- For right angle models: single piece body + back cap + outer ferrule

- **Fast and reliable cable attachment:**

The cable connectors can be either fully crimped or soldered/crimped, offering full flexibility for high volume industrial production with standard manual or pneumatic tooling: fast and reliable

- The center contact can be either crimped or soldered
- The outer contact is attached to the cable by crimping a ferrule

- **Competitive pricing:**

The design and materials used in the manufacturing of the Commercial SMA series allow us to offer connectors at competitive prices to suit a wide range of applications. The connector body is manufactured in brass and the surface plating is available in either gold or in BBR finish (Radiall non-magnetic bright bronze surface finish).

- **Center contact captivation:**

Our connectors have a captive center contact.

Introduction

The "Quick-Lock Formula™": Your cost saving solution

Radiall's patented QMA and QN connectors are now the standard for the RF telecommunications industry. The "QLF" registered trademark, Quick-Lock Formula™ standard, applies to the QMA and QN series and guarantees the full intermateability between suppliers using this trademark. Using QLF™ certified connectors also guarantees the highest RF transmission performance.

QMA (Quick-Lock SMA) and QN connectors (Quick-Lock N) enable fast, secured, and easy matings with minimum space requirements. The QMA and QN series are the perfect alternative to SMA and N connectors in new generation telecommunication systems as well as in many other RF applications.

Saving installation time: Ten times faster

QMA and QN connectors are ten times faster to connect compared to N or SMA connectors, reducing the cost of ownership. With their snap-on interface, it takes only two seconds to connect QN and SMA connectors in field conditions.

Secure connection: Click!

The snap-on connection is insured by a chamfer. In addition, a positive locking system ensures an excellent and secure connection. The disengagement force is lower than the panel tear-off force, preventing any panel damage. QN and QMA connectors have been successfully tested against vibration.

Flexibility: 360° rotation

The cabled plug can freely rotate around the jack, which allows for more flexibility during the mounting process and eases the installation within the equipment.

In addition, it prevents from any added stress on the cable and return loss reduction due to cable bending. As no torque wrench is required, the risk in damaging or scratching the panel is eliminated.

Introduction

Space saving

QN and QMA connectors have a lower space requirement since space for the use of a torque wrench is not necessary. Therefore the distance between connectors is optimized on the panel.

QMA Series

The QMA series with Quick-Lock Formula™, is the innovative patented snap-on generation of brass SMA connectors. With the same interface dimensions, QMA connectors have the identical high electrical performances as the SMA series with an easier and faster mounting design. The QMA series is a cost effective solution for the new generation of base stations. The QMA series is designed for DC to 18 GHz. This series features 100 matings and total reliability as the standard commercial SMA connectors. They are fast and easy to connect and disconnect. The new QMA series offers a large range of connectors: straight and right angle plugs, bulkhead jacks, flange receptacles, PCB receptacles, adapters and more. Models are either full crimp, crimp or solder type for flexible, semi-rigid or conformable cables.

WATERPROOF QMA Series

Radiall expands its QMA product line with new high density RF coaxial **Waterproof QMA (WQMA)** connector solutions with fast and easy snap-on Quick Lock technology. WQMA connectors offer outstanding electrical performance and have environmental characteristics that provide for long lasting durability needed for the most demanding harsh outdoor applications, thus eliminating the need for costly and bulky watertight enclosures or cable entries.

Waterproof QMA CONNECTORS are fully intermateable and backward compatible with any QLF™ certified standard QMA connectors and they provide for excellent ingress protection.

- IP 68 rating when mated
- 100 matings minimum for durability
- Wide temperature range -40°C / +105°C
- Power rating 200W @ 1 GHz, 75°C

QN Series

Offering the same operating frequency range between DC and 11 GHz as the N series, the new QN series performance has been **optimized from DC to 6 GHz for 50Ω applications**. The new QN interface typically features a VSWR of 1.05 from DC to 3 GHz and 1.12 from 3 to 6 GHz. The corresponding return loss is **32 dB from DC to 3 GHz and 25 dB from 3 to 6 GHz**. The high screening effectiveness enables a level of RF leakage as low as -90 dB from DC to 3 GHz and -80 dB from 3 to 6 GHz.

Designed for indoor and outdoor applications such as BTS, antenna systems or test and measurement devices, QN connectors offer an outstanding intermodulation level (-155 dBC / -112 dBm) and IP rating (water and dust protection). The power rating is **300 W at 2.5 GHz** and features **100 matings**.

Characteristics QMA

Test / Characteristics	Values / Remarks
ELECTRICAL CHARACTERISTICS	
Impedance	50Ω
Frequency range	DC - 6 GHz (optimized) DC - 18 GHz (working range)
Typical V.S.W.R. • DC - 3 GHz • 3 GHz - 6 GHz	1.06 1.12
Max insertion loss	0.25 dB
Insulation resistance	5000 MΩ
Voltage rating	≤ 500 V RMS 50 Hz, sea level
Dielectric withstanding voltage	1500 V RMS 50 Hz, sea level
Contact resistance • Center contact • Outer contact	< 3 mΩ < 2.5 mΩ
Admissible power @ 2.5 GHz (continuous power)	125 W @ T = 40°C (150 W @ T = 23°C)
Passive Intermodulation	-120 dBc @ 1.8 GHz (2x20W) (static)
RF leakage • DC - 3 GHz • 3 - 6 GHz	-80 dB min -70 dB min

MECHANICAL CHARACTERISTICS

Mechanical endurance	100 matings
Engagement and disengagement force • Engagement • Disengagement	25 N 20 N
Retention force for interface	> 60 N
Cable retention force 2.6 / 50 S 2.6 / 50 D 5 / 50 S 5 / 50 D 5.7 / 50 D	90 N 110 N 180 N 200 N 220 N
Distance between connectors: c. to c.	12.4 mm min.
Vibration	40 m.s ⁻² at 500 Hz

Introduction

QRE™ is a Quick Lock Ruggedized connector. QRE™ was developed to provide the same advantages as QMA over SMA and designed more for aerospace and defense applications.

QRE™ is made of high grade stainless steel 316L, with Teflon coated fluorosilicone sealing o-rings which make the QRE™ interface waterproof and ultra resistant to chemical aggression and corrosion. The outer slotted spring contact inspired from the QMA design was reinforced to provide reliable electrical contact during vibration and shock conditions. All QRE™ material were chosen and optimized to operate within the extended temperature range typical in Mil-Aerospace applications. Its superior latching mechanism provides the advantage of a snap-on connector while ensuring a very robust and secure connection. The retention force of the interface is 3 times higher than the QMA. With similar dimensions, QRE™ offers high density integration capabilities like QMA. In addition, a specific tool has been designed to easily disconnect QRE™ plugs on high density applications such as active array radar modules or panels.

A limited range of straight and right angle connectors and receptacles is available for semi-rigid and SHF high frequency flexible cable. New connectors can be quickly developed to fit your own ruggedized coaxial cable. QRE™ cable assemblies can be delivered using our SHF airframe, lightweight or outdoor cables, with or without antiabrasion jacket. Adapters are available for test and measurement in QRE™ to SMA and QRE™ to SMA 3.5 configurations.

Characteristics

Test / Characteristics	Values / Remarks
ELECTRICAL CHARACTERISTICS	
Impedance	50Ω
Frequency range	DC - 12.4 GHz
V.S.W.R. typical	
• DC - 3 GHz	1.06
• 3 GHz - 6 GHz	1.11
• 6 GHz - 12.4 GHz	1.17
Max insertion loss	0.25
Insulation resistance	5000 MΩ min
Voltage rating	335 Veff max
Dielectric withstanding voltage	1000 Veff min
Admissible power (CW)	450 W @ 1 GHz - 100 W @ 18 GHz
RF leakage	-95 dB min @ 3 GHz -80 dB min @ 12.4 GHz

MECHANICAL CHARACTERISTICS

Durability	100 matings (500 matings option is available)
Engagement and disengagement forces	65 N typ
Retention force for interface	150 N min
Minimum connector pitch	12.4 mm (distance between center conductors)
Vibration	MIL STD 202 method 204 condition D
Shock	MIL STD 202 method 213 condition I

ENVIRONMENTAL CHARACTERISTICS

Temperature range	-55/+165°C
IP rating (when mated)	IP 68
Hermeticity (when mated)	10 ⁻⁶ atm.cm ³ /s (CEI 68-2-17 Method Qk)

Introduction

50Ω	DC - 4 GHz
	DC - 1.5 GHz (commercial)
	DC - 1.0 GHz (Eco)
	DC - 10 GHz (TRIAxIAL)
75Ω	DC - 1.5 GHz
	DC - 6 GHz (HDTV)
	DC - 1.0 GHz (Eco)

GENERAL

- Worldwide standardized coaxial connectors
- Bayonet coupling
- Proven strength and reliability
- Good RF performance

APPLICABLE STANDARDS

- MIL-C-39012 / MIL STD 348-A/301
- IEC 169-8
- CECC 22120
- NF-C-93564 KBN series
- UTE-C-93564

APPLICATIONS

- Civil and military radio-telecommunication equipment
- Test and measurement
- Video communication
- Broadcast
- Industrial network
- General electronics

The BNC connector is the most popular coaxial connector series in the world, featuring a two-pin bayonet coupling system for quick and reliable engagement and disengagement.

• Wide range:

Radiall's BNC connectors are available with two characteristic impedances: 50Ω and 75Ω. They are completely intermateable. RADIALL also offers low-cost BNC range, and a triaxial BNC TRX series.

• Convenient three piece design:

Straight and right angle crimp type cable connectors feature a three piece design: single piece body + center contact + outer ferrule.

Introduction

• Fast and reliable cable attachment

- Cable connectors can be either fully crimped or soldered/crimped, offering full flexibility for fast, reliable, high-volume production with standard manual or pneumatic tooling.
- The center contact can be either crimped or soldered,
- The outer contact is attached to the cable by crimping a ferrule.

COMPOSITE BNC 75Ω HDTV CONNECTOR

GENERAL

- The first lightweight composite HDTV BNC available on the market
- Easy to connect and disconnect from the rear—ideal for high-density and recessed bulkhead applications
- Color-coded boots directly on the connector for easy video signal identification
- Guaranteed frequency up to 6 GHz for studio-quality performance
- 1000 mating cycles minimum for guaranteed durability in the field
- True 75Ω design

HDTV places new demands on maintaining high signal integrity at high data rates, from studio-quality broadcast production to video conferencing equipment, our selection of affordable HDTV BNC connectors offer more bandwidth, more performance, and are easier to use.

Our new technologically advanced high-speed composite BNC 75Ω HDTV connector features an incredible easy-to-use two-piece design that makes it easy to crimp on the cable. This new connector can handle data rates up to 3 Gbps or higher while meeting or exceeding SMPTE 292M and 424M standards. The gold plated center and outer contacts provide outstanding electrical performance with a frequency range of up to 6 GHz, and a low return loss of -32 dB at 3 GHz.

The connector comes in a wide variety of colors for signal cable identification and its special curved interface composite material design with positioning marks makes it easy and fast to connect in high-density and recessed bulkhead applications.

APPLICATIONS

- Broadcast TV stations and studios
- Video routing and production
- Video surveillance equipment
- Video conference equipment

Introduction

N 18 connectors are 50 ohm precision N Type connectors designed to perform through 18 GHz. N connectors are a popular medium sized option commonly used in microwave and RF applications that require high power handling and good electrical performance. Radiall Type N connector interfaces utilizes a PTFE (Teflon) dielectric. The male connectors are provided with a 19 mm (3/4 in.) hex coupling nut so they can be properly torqued. Connector bodies are made from stainless steel, and contacts are made from gold plated and heat treated beryllium copper contacts to insure long life and reliability.

Radiall offers N connectors for semi-rigid and low loss flexible cables, receptacles and precision adapters.

Connectors for low loss flexible cables and TestPro cables are not detailed in this section. They are available in our cable assembly offer.

TYPE N 18 DESIGN FEATURES:

- Excellent performance up to 18 GHz
- Low VSWR and insertion loss
- Highly robust construction for reliability
- Superior interface environmental seal
- High power capability

Interface

N 18 GHz

IMPORTANT: the 50Ω and the 75Ω connectors are **NOT INTERMATEABLE**, results in the interface destruction.

Introduction

TNC 18 connectors are 50 ohm precision TNC Type connectors designed to perform through 18 GHz. TNC connectors are a popular medium sized option commonly used in microwave and RF applications that require average power handling and good electrical performance. Radiall TNC connector interfaces utilize a PTFE (Teflon) dielectric. The male connectors are provided with a 14 mm (9/16 in.) hex coupling nut so they can be properly torqued. Connector bodies are made from stainless steel, and contacts are made from gold plated and heat treated beryllium copper contacts to insure long life and reliability.

Radiall offers TNC connectors for semi-rigid and low loss flexible cables, receptacles and precision adapters.

Connectors for low loss flexible cables and TestPro cables are not detailed in this section. They are available in our cable assembly offer.

TNC 18 DESIGN FEATURES

- Excellent performance up to 18 GHz
- Low VSWR and insertion loss
- Rugged construction for reliability
- Superior interface environmental seal
- Medium power capability

Introduction

SMA 2.9 series is compatible with K® series, 2.92 mm, SMA and SMA 3.5 series, and has a shortened male center contact, ensuring a non destructive mating. Radiall offers four product variations for SMA 2.9 to meet all your needs with two different designs. The standard design is using our “ULTEM” insulator technology and is qualified up to 40 GHz. The high frequency design is using our “KAPTON” insulator technology and is qualified up to 46 GHz. All versions feature the same electrical high performance and are available in a variety of configurations.

SMA 2.9 FOR GENERAL USE, “ULTEM” TECHNOLOGY, DC-40 GHz

This robust design is suitable for most applications. The ULTEM insulator provides a high ingress protection level against chemicals, fluids or dust and is well suited for high frequency aerospace and military equipment.

3D view of SMA 2.9 “ULTEM” design

SMA 2.9 FOR TEST LABORATORY USE, “KAPTON” TECHNOLOGY, DC-46 GHz

The KAPTON insulator design is excellent for high frequency measurements in test laboratories. KAPTON is also very stable with temperature. Radiall SMA 2.9 adapters using KAPTON are specified DC-46 GHz and operate within a large temperature range - 65°C/+200°C.

3D view of SMA 2.9 “KAPTON” design

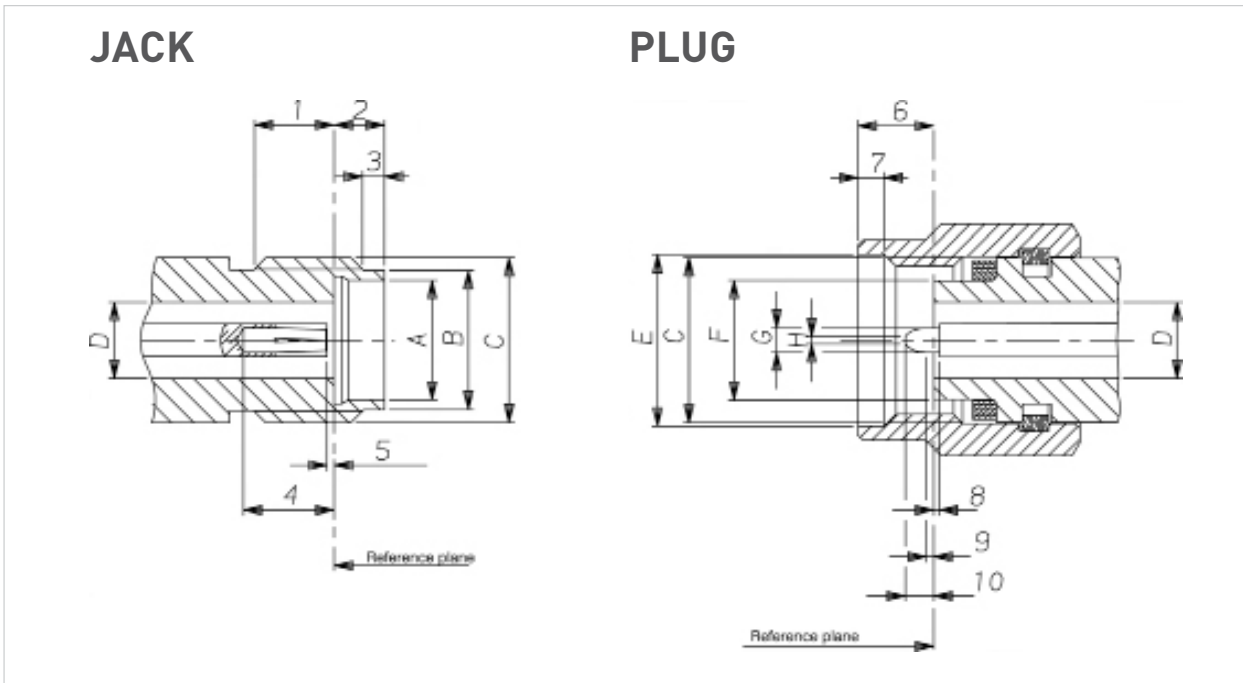

SMA 2.9 FOR SPACE APPLICATIONS

Radiall is a certified manufacturer of connectors for space applications according to ESA specifications. A range of space qualified SMA 2.9 connectors using the ULTEM insulator technology is available. Please consult us.

SMA 2.9 FOR HARSH ENVIRONMENT

Radiall also offers a range of cable assemblies equipped with specific connectors for applications in harsh environment. The connectors are made of high grade stainless steel 316L ultra resistant to corrosion and wear. Please consult us.

Introduction

2.4 mm connectors are 50 ohm precision connectors designed for use to 50 GHz. The design eliminates the fragility of the SMA and 2.92 mm connectors by increasing the outer wall thickness and strengthening the female fingers. The outer conductor measures 2.4 mm and the robust wall of the connector body is designed to engage before the center conductor, assuring a rugged, repeatable mating interface. The male connectors are provided with a 8 mm [5/16 in.] hex coupling nut so they can be properly torqued.

2.4 mm connectors are mechanically compatible with 1.85 mm connectors. They cannot mate with SMA, 3.5-mm and 2.92-mm without the use of precision adapters.

Radiall offers 2.4 mm connectors for semi-rigid and low loss flexible cables, receptacles, and precision adapters.

Connectors for low loss flexible cables and TestPro cables are not detailed in this section. They are available in our cable assembly offer.

2.4 mm DESIGN FEATURES

- Excellent performance up to 50 GHz
- Low VSWR and insertion loss
- Rugged construction for reliability
- Mechanically compatible with 1.85 mm connector series

------------------------	------------------

ELECTRICAL CHARACTERISTICS

Impedance	50Ω
Frequency range	DC - 50 GHz
V.S.W.R.	< 1.05 + 0.003 F (GHz)
Insertion loss	0.04 √ F (GHz)
RF leakage	- 100 dB max
Insulation resistance	<= 1400Veff
- contact resistance	≥ 5000 mΩ
Contact resistance	
• Outer conductor	≤ 0.8 mΩ
• inner conductor	≤ 4 mΩ
Voltage rating	250 V(RMS)
Dielectric withstanding voltage	500 V(RMS)

MECHANICAL CHARACTERISTICS

Mechanical endurance	500 matings
Force to engage and disengage	≤ 23 N cm
Mating torque	90 N cm
Coupling nut retention force	≤ 272 N
Cable retention force	
• Outer conductor	130 N
• inner conductor	
Contact captivation	27N

ENVIRONMENTAL CHARACTERISTICS

Temperature range	-65°C / + 165°C
Thermal shock	MIL STD 202, method 107, condition B, -65°C / + 165°C
High temperature test	MIL STD 202, method 108, condition D, 1000 H at 150°C
Corrosion (salt spray)	MIL STD 202, method 101, condition B, 48 H / 35°C / 5 %
Vibration	MIL STD 202, method 204, condition H, 30g RMS
Shock	MIL STD 202, method 213, condition I, 100g
Moisture resistance	MIL STD 202, method 106, 80% / 100% 25°C / 65°C 10 cycles

Introduction

50Ω	DC - 11 GHz (standard N) DC - 18 GHz (N 18 GHz)
75Ω	DC - 1.5 GHz

GENERAL

- Standard coaxial connectors
- Screw-on coupling
- High durability and proven strength
- High power rating
- Excellent RF performance

APPLICATIONS

- Wireless communications
- Civil and military radio-telecommunication equipment
- Countermeasure
- Navy equipment
- Industrial applications

APPLICABLE STANDARDS

- MIL-C-39012 / MIL STD 348-304
- CEI 169-16
- CECC 22210
- NF-C-93566
- DS 8811

COMPOSITE RECEPTACLES

Radiall introduces its new composite N receptacles. Composite N connectors offer outstanding electrical performance and are the best compromise in terms of weight, cost and mechanical characteristics to replace existing brass technology.

Features and benefits

Intermateable with standard N connectors for backward compatibility

Evenly distributed contact pressure for a better intermodulation

Composite material to remove any potential corrosion in outdoor applications

Color coding, optional

Light material for weight saving for cost sensitive equipments

Best material selection for outstanding torque resistance

Many center contact options available for an easy adaptation to customers' application

POWER SWITCHING CONNECTORS

It's a "two in one" solution replacing the existing standard RF switches by integrating the switch function into a receptacle connector. This solution provides a unique means of switching between two RF signal paths. As user friendly as a standard connector, the switch is mechanically activated by mating and unmating the connector.

Main advantages

- Reliable
- Increases the density
- Excellent electrical and mechanical performances
- Reduction of the cost of ownership
- Betty RF adaptation
- Good isolation
- Available in right or left versions

Main applications

- Telecom applications
- RF power amplifiers

Introduction

Radiall offers a wide range with a standard plating finish:
BBR (Bright Bronze Radiall) = high performance non magnetic alloy

• FULL CRIMP MODELS

A fast and reliable attachment system that can be easily achieved in a field environment, with minimum easy-to-use tooling (including models for 2 and 2.6 mm dia cables). All our full crimp connectors are single piece body.

• LOW INTERMODULATION CONNECTORS

Radiall maintains extensive knowledge in this field and has developed N series connectors that are specially designed for base stations of applications where the elimination of intermodulation products is of the utmost importance:

- Optimized for 900 - 1800 MHz bands (and able to work up to 11 GHz like the standard models)
- IMP_3 performance = -110 dBm (-153 dBc)
- New models for corrugated and low loss flexible cables
- High performance non magnetic materials and platings (silver and BBR)
- New 6 flats coupling nut (18 mm), allowing high coupling torque (170 Ncm) thanks to torque wrench
- Non slotted outer contact

• 18 GHz PRECISION CONNECTORS

Suitable for medium to high power applications and precision microwave test equipment. Long life duration and enhanced electrical performance in severe environmental conditions. N18 series mate with all 50 ohms N connectors.

• VERY LOW INTERMODULATION CABLE ASSEMBLIES

For severe intermodulation conditions, we propose a range of low intermodulation cable assemblies $IMP_3 \leq 125$ dBm

For further details, please read our:

- Intermodulation application guide **(D1 032 DE)**
- BBR plating application guide **(D1 030 DE)**

IMPORTANT: the 50Ω and the 75Ω connectors are NOT INTERMATEABLE, results in the interface destruction.

FIELD-REPLACEABLE CONTACTS (for universal receptacle)

These accessories have been specifically designed for the adjustment at the rear of hermetically sealed universal receptacles. The choice of their dimensions depends on the PCB or on the thickness of the MIC box. These contacts and insulators are also compatible with SMA UNIVERSAL RECEPTACLES.

Introduction

50Ω	DC - 11 GHz (standard and TNC self-lock) DC - 18 GHz (TNC 18 GHz)
75Ω	DC - 1.5 GHz DC - 1 GHz (recommended)
50 and 75Ω	DC - 1.5 GHz (commercial)

GENERAL

- Screw-on equivalent to BNC bayonet series
- Good RF performance
- Suitable for high power levels
- Long life and high strength
- 4 ranges:
 - Standard TNC series (50 and 75Ω fully intermateable)
 - Commercial TNC series (50 and 75Ω)
 - 18 GHz TNC series (50Ω)
 - TNC selflock series 50 ohms

APPLICABLE STANDARDS

- MIL-C-39012 / MIL STD 348A/313
- IEC 60169-17
- CECC 22200

APPLICATIONS

- Avionics
- Aeronautics
- Countermeasures
- Telecommunications

TNC Self-lock, the latest addition to the TNC range

TNC Self-lock plugs are designed for civil aerospace applications. They are qualified for use in harsh and high vibration environments. Their specific anti-rotation coupling nut eliminates the need for safety lock wire, which results in significant time savings during installation on board the aircraft. They are fully compatible with all standard TNC receptacles and adapters.

• Models for semi-rigid cables			
Thermal shock	3-20	MIL-STD-202, method 107, condition B	
High temperature endurance		MIL-STD-202, method 108	
Corrosion (salt spray)	3-13	MIL-STD-202, method 101, condition B	
Vibrations	3-18	MIL-STD-202, method 204, condition B	
Shocks	3-19	MIL-STD-202, method 213, condition G	
Moisture resistance	3-21	MIL-STD-202, method 106	
Low pressure	3-22	Not applicable	
Hermetic seal		Applied vacuum 10 ⁻⁶ mm of Hg (Torrs) leakage rate < 10 ⁻⁶ atm/cm ³ /s	
Leakage		Pressure 3.5 bars; duration 2 mn; temperature 15°C to 25°C	

MATERIALS AND PLATING

Body and center pin contact	Brass as per QQ-B-626	Nickel plated
Center socket contact	Beryllium copper as per QQ-C-530	Gold plated
Ferrules	Brass	
Insulators	PTFE teflon	
Gaskets	Silicone elastomer	

All dimensions are given in mm.

Characteristics commercial TNC

Test / Characteristics	Values / Remarks
------------------------	------------------

ELECTRICAL AND ENVIRONMENTAL CHARACTERISTICS

Impedance	50Ω or 75Ω
Frequency range	DC - 1.5 GHz
Test voltage	1500 V rms
Operating voltage	500 V rms
Insulation resistance	5000 MΩ min (500 V)
Contact resistance	10 mΩ max
Temperature range	-35°C / +70°C

PLATING

Body	Nickel
Center contacts	Gold

Introduction

50Ω	DC - 11 GHz (maximum) DC - 3 GHz (optimized)
-----	---

GENERAL

- Standard coaxial connectors
- Bayonet coupling

APPLICABLE STANDARDS

- MIL-C-39012 A
- MIL-C-3898 A
- MIL-C-23329 A
- IEC 169-7

APPLICATIONS

- Civil aerospace
- Maintenance

Type C Connectors were engineered in the late 1940s. It is similar to type N but with a bayonet coupling for rapid connection and disconnection.

Introduction

50Ω	DC - 18 GHz
DC-34 GHz possible	

GENERAL

- Miniature coaxial connectors
- Screw-on coupling
- High RF performance
- Reduced weight and size

APPLICATIONS

- Military aeronautics
- Missiles
- Detection - countermeasures

APPLICABLE STANDARDS

- CECC 22 160
- MIL-STD-348 fig.319

SPACE QUALIFIED APPROVAL

- SCC 3402 (ESA)

Introduced in the 1960s, the SSMA series of connectors are of identical construction to the classic SSMA series but offer the benefit of reduced dimensions. They are recommended for use on equipment having limited component space availability combined with frequency requirements up to 34 GHz. Today, SSMA is mostly used for maintenance of existing equipment. For new projects, we advise using SMP or SMP-LOCK™ connectors.

Characteristics

Test / Characteristics	Values / Remarks
------------------------	------------------

ELECTRICAL CHARACTERISTICS

Impedance	50Ω	
Frequency range	DC - 18 GHz	
VSWR	.085" / RG405 semi-rigid cable: 1.07 + 0.01 F (GHz)	
Insertion loss (typ.) dB	0.04 √F (GHz)	
RF leakage (min) dB	-90 + F (GHz)	
Insulation resistance	≥ 1000 MΩ	
Contact resistance	Center contact: 5mΩ max. / Outer contact: 2.5mΩ max.	
Voltage in V. Rms	Dielectric withstanding voltage	Working voltage
• At sea level	≥ 750 V.	≤ 250 V.
• At 70,000 ft	150 V.	65 V.

MECHANICAL CHARACTERISTICS

Durability	> 500 cycles
Force to engage / disengage	Torque 12 N.com (2 inch-pounds)
Recommended coupling not torque	60 to 80 N.com (5.3 to 7.1 inch-pounds)
Cable retention force	.085: / RG405 cable > 136 N (30lbf)
Center contact retention force	22N (5lbf) min.

ENVIRONMENTAL CHARACTERISTICS

Temperature range	- 55°C / +155°C • Standard models • Semi-rigid cables
Thermal cycling	MIL-STD-202, Method 102, Condition D
Vibration	MIL-STD-202, Method 204, Condition A, 10g
Shock	MIL-STD-202, Method 213, Condition A, 50g
Moisture resistance	MIL-STD-202, Method 106
Corrosion	MIL-STD-202, Method 101, Condition B

MATERIALS AND PLATING

	Material	Plating
Body/nut	Stainless steel / Brass	Gold or Passivated / BBR

Introduction

GENERAL

- DC - 12 GHz
- Impedance 50Ω
- Snap-on coupling
- Microminiature connectors
- Very low weight and size

APPLICATIONS

- Civil and military telecommunications
- Video equipment

APPLICABLE STANDARDS

- MIL-STD-348A
- IEC 169-19
- MIL-PRF-39012

SSMB is a small size version of SMB, developed in 1995.

Characteristics

Test / Characteristics	Values / Remarks

Introduction

SSMC connectors are about a third smaller than SMC. They are mainly used in avionics, missiles, and any limited-space applications that require the security of a threaded coupling.

GENERAL

- DC - 12 GHz
- Impedance 50Ω
- Screw-on coupling
- Microminiature connectors
- Very low weight and small size

APPLICATIONS

- Civil avionics
- Military aerospace, missiles

APPLICABLE STANDARDS

- MIL STD 348A
- IEC 60169-20
- MIL-PRF-39012

Characteristics

Test / Characteristics	Values / Remarks
------------------------	------------------

GENERAL

Impedance	50Ω
Frequency range	DC - 12.4 GHz
Temperature range	-65°C to + 165°C

ELECTRICAL CHARACTERISTICS

Insertion loss in dB	0.3Vf (GHz)	
RF leakage	≤ -55 dB at 1 GHz	
VSWR max up to 4GHz	RG 178 cable: 1.20 + 0.02F (GHz)	
Contact resistance (inner contact)	Center contact: 5mΩ max. Outer contact: 1mΩ max.	
Insulation resistance	1000MΩ	
Voltage in VRMS <ul style="list-style-type: none"> • At sea level • At 70,000 ft 	Dielectric withstanding voltage <ul style="list-style-type: none"> ≥ 500V 100V 	Working voltage <ul style="list-style-type: none"> ≤ 250V 60V

Introduction

50Ω

DC - 7.5 GHz

GENERAL

- Standard coaxial connectors
- Screw-on coupling
- High power rating
- Excellent RF performance

APPLICABLE STANDARDS

- IEC 169-4
- DIN 47223
- CECC 22 190

APPLICATIONS

- Mobile communication infrastructure networks: combiner, diplexer, filter...
- Jumper and feeder cables assemblies
- Radio links
- Indoor and outdoor applications

Radiall's 7/16 series has been developed using the latest technology advances in connector design. These connectors are easy to use, highly reliable, innovative and are designed to meet the needs of the telecommunications market. The complete connector series feature the following characteristics:

- An extensive range, with optimized component part design
- An upgraded cross-knurled coupling nut allowing better manual tightening

Composite 7/16

Radiall expanded its line of innovative 7/16 composite connectors with jacks and receptacles as a lightweight, low cost alternative to brass connectors. Manufactured with corrosion-proof, composite materials these new single-piece connectors are UV resistant, meeting IEC 68-2-5 and IEC-68-2-9 to withstand all environments, including harsh outdoor installations. Radiall now offers over 20 different variations. The selection of the composite materials is a result of an in-depth competitive analysis of creeping speeds of zinc and aluminum alloys. Not only do the composite materials offer considerable performance advantages guaranteeing up to 500 matings; but with more than a 50% reduction in weight, this receptacle reduces the overall weight of the final module as well as transportation costs.

Introduction

High performance range

- Frequency range: DC - 7.5 GHz
- 2 types of coupling nut:
 - cross-knurled and 6 flats 27 mm wide coupling nut (3 000 N.cm)
 - 6 flats coupling nut (32 mm wide), allowing high coupling torque (3 500 N.cm) when used with a torque wrench
- Intermodulation performance: 2 levels
 - 125 dBm cable assemblies
 - 110 dBm connectors and cable assemblies

2 types of coupling nut

Radiall has developed its intermodulation measurement equipment following the IEC 46 D/292/NP standard proposal. It is aimed at third-order IMP measurements through the reflection method. The range of this test set-up is -132 dBm (-175 dBc) under 2 x 20 W.

- High performance non-magnetic material (brass) and plating (silver) with anti-tarnishing finish (strike of BBR)
- Non-slotted outer contact on standard products
- The 7/16 connector series benefits from a complete easy-to-use range of tooling

Custom models

To fulfill customer requirements, Radiall offers complete design of custom connectors according to the 7/16 series standard.

What is INTERMODULATION?

Intermodulation (IM) is an undesired modulation that leads to a distortion of the output high-frequency carrier. It is defined as the ratio of the 3rd order intermodulation products and the incident signal power because the most troublesome IM products are those of 3rd order.

For more detailed information, including our intermodulation measurement system and our product range, please visit www.radiall.com

Introduction

50Ω	DC - 6 GHz
-----	------------

Overview

Radiall has expanded its broad range of Quick Lock products with QLI (Quick Lock Low Intermodulation). With the QLI, Radiall introduces a new solution for harsh environments, where performance and safety are critical. QLI connectors are designed to provide performance similar to DIN 7/16 with a very low intermodulation level, and a quick and safe connection, without any tools. Compared to 7/16, QLI is cheaper but also smaller (-31%) and lighter (-62%) offering an easy to use concept with its bayonet coupling system.

Its double sealing, in addition to a special anti-corrosion & watertight plating, makes this connector the best choice for outdoor installations and also indoor applications where the best performance is required. QLI connectors are available in plugs, jacks, straight or right angle, square sockets & bulkhead models with a compact design allowing high density integration (saving time on field installation).

Its simple jack design makes QLI robust and easy to clean when equipments are subjected to severe conditions in the field.

HIGH PERFORMANCE

- Impedance 50Ω
- Frequency range DC - 6 GHz
- Very low intermodulation level $\leq -163\text{dBc}$
- Bayonet locking concept provides coupling retention force 450 N
- VSWR $1.04 + 0.02 \text{ V}$
- Meets all requirements for IP67

GENERAL

- Quick Lock Low Intermodulation connector
- Bayonet coupling mechanism
- High power rating
- 31% smaller & 60% lighter than 7/16

APPLICABLE STANDARDS

- IEC 61169
- MIL PRF 39012

APPLICATIONS

- Telecom
- Medical
- Industrial
- Indoor and outdoor use

- High mating life
- 3 step connection: Engage, Push & Lock
- Intuitive design concept
- Light weight
- Reduced size allows more space for other components
- RF Power: Up to 1000 W @ 2 GHz

Characteristics

Test / Characteristics	Values / Remarks
------------------------	------------------

ELECTRICAL CHARACTERISTICS

Impedance	50Ω
Frequency range	DC - 6 GHz
Typical VSWR	1.04 + 0.02 f (GHz)
Maximum insertion loss	0.05 √F (GHz) dB
Insulation resistance	5000 MΩ min
Voltage rating	<=1400 Veff
Dielectric withstanding voltage	>2500 Veff
Contact resistance	≤ 1 mΩ ≤ 1.5 mΩ
• Center contact	
• Outer contact	
Power	1000W @ 2 GHz
Intermodulation	>163dBc (>120 dBm) 2x20W
Typical RF Leakage	-100dB@1 GHz; -90dB@3 GHz; -80dB@5 GHz

MECHANICAL CHARACTERISTICS

Mechanical endurance	100 cycles
Engagement & disengagement force	<= 60N <= 50 N
• Engagement	
• Disengagement	
Mating mechanical retention force	450 N min.
Cable retention force	350 N mini with 1/2" S cable
Vibration	IEC 611169-1 10g / 10-500 Hz

ENVIRONMENTAL CHARACTERISTICS

Temperature range	- 55 °C ~ + 120 °C
Moisture resistance	IP67

Introduction

50Ω

DC - 6 GHz

GENERAL

- Low Intermodulation connector
- Screw-on & Push-pull coupling mechanism
- High power rating
- 30% smaller & 60% lighter than 7/16

APPLICABLE STANDARDS

- IEC 61169
- MIL PRF 39012

APPLICATIONS

- Telecom
- Medical
- Industrial
- Indoor and outdoor use

Overview

Designed for major telecom equipment manufacturers, the 4.3-10 series offers a small, lightweight solution for outdoor telecom applications where high performance is essential and low intermodulation is required.

Offering a broad product portfolio consisting of the Radiall 4.3-10, 4.1-9.5, 7/16 and the innovative QLI (Quick Lock Low Intermodulation) connector, this solution is suitable for harsh environments where reliability is required.

Available in a variety of configurations including:

- Jack/Bulkhead
- Square flange receptacles and plugs
- Right angle models
- Solder, crimp and clamp models
- Screw-on and push-pull coupling mechanism

The lightweight 4.3-10 connectors are 30% smaller and 60% lighter than comparable 7/16 square flange jack receptacles. The new interface features a high intermodulation level ranging from 0-6 GHz and provides a low intermodulation level at <-166dBc.

Radiall's 4.3-10 connector solution is designed in accordance with international standards and manufactured to meet environmental safety requirements.

HIGH PERFORMANCE

- Impedance 50Ω
- Frequency range DC ~ 6 GHz
- Very low intermodulation level $\leq -166\text{dBc}$
- Screw-on and Push-pull coupling mechanism for safety and easy to use
- VSWR 1.04 + 0.01 V_f
- Meets all requirements for IP67
- High mating life
- 3 step connection: Engage, Push & Lock
- Intuitive design concept
- Light weight
- Reduced size allows more space for other components
- RF Power: Up to 500 W @ 2 GHz

Introduction

50Ω

DC - 6 GHz

GENERAL

- Screw-on coupling mechanism
- High power rating
- 20% smaller & 50% lighter than 7/16
- Low coupling torque
- Low intermodulation

APPLICABLE STANDARDS

- IEC 61169
- MIL PRF 39012

APPLICATIONS

- Telecom
- Medical
- Industrial
- Indoor and outdoor use

Overview

Introducing 4.1-9.5, Radiall completes its power connector range with a low intermodulation series. 4.1-9.5 is designed to provide similar performance to 7/16 with smaller size and weight, using a proven screw-on coupling mechanism. With its corrosion resistance, Radiall 4.1-9.5 is the ideal choice for telecom applications where severe conditions require a high performance and robust connector.

HIGH PERFORMANCE

- Impedance 50Ω
- Frequency range DC ~ 6 GHz
- Very low intermodulation level ≤ -125 dBc
- Screw-on coupling mechanism
- Coupling retention force 450 N
- VSWR 1.02 + 0.02 √f
- Meets all requirements for IP67
- High mating life
- Light weight
- Reduced size allows more space for other components
- RF Power: Up to 1000 W @ 1 GHz

Characteristics

Characteristics

TYPE 43 GENERAL TECHNICAL SPECIFICATION

Radiall 75Ω coaxial Type 43 connectors are designed to meet or exceed the requirements of BS9210 F0022. The following information is subject to change without notice. The performance values shown are typical and may not relate to all connector styles available.

Test / Characteristics	Values / Remarks
------------------------	------------------

ELECTRICAL CHARACTERISTICS

Impedance	75Ω
Frequency range	DC - 3 GHz
Temperature range	-40°C to + 100°C
V.S.W.R. (Straight Connectors)	1.20 max
V.S.W.R. (Right Angle Connectors)	1.25 max
Voltage Rating	500 Vrms max
Dielectric Withstanding Voltage	1500 Vrms min
Insulation resistance	5000 MΩ min

MECHANICAL CHARACTERISTICS

Durability	250 matings
Cable retention (Plug connectors) (Socket connectors)	60 to 220 N min***
Center contact retention (Plug connectors) (Socket connectors)	22 N min
Weight	10 g (grams) typical

MATERIALS AND PLATING

Components	Materials	Platings
Body Components*	Brass	Selective Gold
Outer contact	Bronze	Selective Gold
Center contact (male)	Brass	Gold
Center contact (female)	Beryllium Copper	Gold
Insulator	PTFE	Not applicable
Panel Grommet	Polyacetal	Not applicable
Ferrule	Brass	Nickel
Panel Mounting Hardware**	Brass or Phosphor Bronze	Nickel

* In general all Type 43 series connector bodies are gold plated in mating areas.

As a note, the single piece Type 43 connector body is gold plated in the mating area with other surfaces being nickel coated. All multi-piece connector bodies comprise of a gold plated front body (mating area) and a nickel plated back body (crimp area).

** Panel mounting hardware includes components such as - nut, washer, spacer etc.

*** Note, **lower cable retention value** for RG179 - 60 N min and BT3002/TZC 75024 - 150 N min

Introduction

Radiall introduced the MMP contact technology (Micro Miniature Pressure) in 2001 to meet the needs of the telecommunication industry for ultra low profile and cost effective board connectors. The MMP technology can be found in 2 product lines:

- **IMP** series: RF board-to-board application
- **UMP** series: RF board to wire application

BOARD-TO-BOARD APPLICATION

BOARD TO WIRE APPLICATION

The **IMP** series (Interconnect Micro miniature Pressure contact) consists of 1 coaxial connector when usually the same application requires either 2 coaxial connectors (a male SMT receptacle and a female SMT receptacle), or 3 coaxial connectors (2 SMT receptacles and an adapter).

IMP
One piece connector

MCX
2 coaxial connectors

MMS
3 coaxial connectors

The **UMP** series (Ultra Miniature Pressure contact) consists of 1 coaxial plug and 1 SMT edge receptacle.

Introduction

IMP PRODUCT FEATURES

- Cost effective solution: one piece connector only
- High density
- World's lightest connector: (example 0.02 g for the IMP 2 mm)
- World's lowest profile for a board-to-board coaxial connexion (2 mm)

IMP INSTALLATION

The distance between the 2 boards should be precisely ensured by a mechanical device (such as spacers).

Contact Radiall for support regarding the spacers layout in your particular application. Application notes are available upon request.

IMP PRODUCT RANGE

IMP is available in 2 mm board-to-board distance. Other heights can be developed upon request.

UMP PRODUCT FEATURES

- Low profile: 2 mm and 3 mm
- Small space for connection: needs only 2 mm of height
- Cost effective solution: 1 coax connector only
- Large cable range from 0.8 to 2.6 mm
- High durability, up to 10,000 cycles

UMP TYPE OF MATING:

- Lock: - can only be disconnected using a tool
- number of matings 100
- withstands severe vibrations
- Snap-on: - number of matings 3000
- Snap-on: - number of matings 10,000
- for test applications

Plug exist with the 3 types of mating:

APPLICATIONS

IMP and UMP series can be used for board-to-board and board-to-antenna applications:

- WLAN
- GPS receivers
- Automotive
- Handheld radios
- RFID

Characteristics

	Values / Remarks	
--	------------------	--

ELECTRICAL CHARACTERISTICS

	IMP	UMP
Impedance	50Ω	
Frequency range	DC-6 GHz	
V.S.W.R. Max	1.3	1.05 + 0.03F (mated connectors)
Insertion Loss (dB)	0.2 V F (GHz)	
RF Leakage	-40dB min at 2 GHz	
Insulation resistance	3000MΩ	1000MΩ min
Contact resistance (depending on PC board) • Center contact • Outer contact	60 mΩ 10 mΩ	
Working voltage	100 VRMS	
Dielectric withstanding voltage	350 VRMS	
Power at sea level, at 20°C	20 W (at 3 GHz)	50 W (at 1.8 GHz)

MECHANICAL CHARACTERISTICS

Durability	> 20	- Lock: 100 - Snap-on: 3000 - Slide-on: 10,000
Weight (g)	0.02	- Receptacle: 0.03 - Plug: 0.08
Axial misalignment from nominal board to board distance in mm (inch)	±0.2 (.008)	N/A
Radial misalignment in mm (inch)	0.2 (.008)	N/A
Force to engage	-	5N
Cable retention force	-	20N - 100N
Sine vibrations	-	IEC 68-2-6
Random vibrations	-	IEC 68-2-36
Shocks	-	IEC 68-2-29
Retention on test board	-	20N min

ENVIRONMENTAL CHARACTERISTICS

Temperature range	-40 / +90°C

PROCEDURE FOR USE OF SMT NOZZLE FOR RECEPTACLE

The following pick and place equipment and associated nozzles were successfully tested for the IMP:

- A) FUJI: QP-242/MODULE TYPE
QP-242 IMP MOUNT MODULE NAME: TYPE BI-612
IMP NOZZLE PART N°: I-S12B-013-100 (NOZZLE PIE 1.3)
- B) PANASONIC: MSF type machine
NOZZLE PART N°: 10 807 GH 810

For other equipment, please contact your supplier to define equivalent nozzles.

Receptacles, pigtails and cable assemblies

SMT RECEPTACLES

-  Gold over Nickel preferred for solder paste
Gold can be replaced by tin lead (see test report SC2000.02.6587)
-  Gold over Nickel contact area free of any surface contaminant
-  Ground + varnish

SMT NOZZLE

Automated pick and place machines use standard tooling to peel the antistatic film off. Sometimes the "A" dimension of this tool is shorter than the overall "B" width between the two legs of the receptacle. There is therefore a risk for the two legs being deformed while they pass through the tool during the suction operation. The user must then widen the "A" dimension of the peeling tool.

Introduction

The HN series is designed for industries needing accuracy in RF and HV applications up to 5000 Volts. Radiall continuously strives to improve the range of HN coaxial connectors for nuclear and harsh environments. Our customized connectors allow high radiation resistance, and by using a hexagonal nut for mating, they provide a secure connection. Please contact Radiall regarding this dedicated nuclear range.

Introduction

This catalogue features 4 series of high voltage coaxial connectors - all able to withstand continuous voltage up to 20 000 V.

By redesigning the BNC HT interface in order to benefit from its high performance to serve MHV, Radiall created BNC HT/MHV. Radiall BNC HT/MHV is fully compatible with BNC HT with MHV interface according to MIL-STD-348.

TEST VOLTAGES

The test voltages quoted in this catalogue are indicative only. They correspond to those made under normal atmospheric conditions during a test period of 1 minute as specified in the French standard NF EN 60068 - 1.

OPERATING VOLTAGES

The operating voltage is chosen under the responsibility of users, depending on the conditions in which the connectors will be used (environment, safety factor...). The indicated cables are recommended for the mechanical and dimensional suitability with our connectors. As to the electrical characteristics of the cables and in particularly the maximum voltage capacity, it is necessary to conform with the recommendation of the cable manufacturer.

Characteristics BNC HT/MHV

BNC HT/MHV connectors are not intermateable with the BNC and SHV series.

ELECTRICAL CHARACTERISTICS

Frequency range	DC - 2 GHz

Introduction

These safe high voltage connectors meet all requirements of the NIM Standard (Nuclear Instrumentation Module) Specification ND 545 Amendment A. Both the pin and socket contacts are securely recessed inside the insulation to guard against potential electrical shock when live unmated connectors are handled.

They are particularly recommended for impulse circuits of linear accelerators as well as in military, nuclear and medical electronics.

These connectors are not intermateable with the BNC and BNC HT/MHV series.

Characteristics

ELECTRICAL CHARACTERISTICS

Frequency range		DC - 2 GHz
Impedance		50Ω
VSWR (plug and jack)		< 1.20 + 0.3 F (GHz)

Introduction

Radiall . . . The Best Choice for Non-Magnetic Connectivity Solutions

We Know Your Market

We offer a range of non-magnetic RF connectors and cable assemblies for medical and space applications.

Why Radiall Is Your Best Choice

- Collaboration: We work closely with your engineers to understand your business, your technical needs, and your budget.
- High Performance, Competitively Priced Products: Our connectivity solutions give you the best combination of performance and value.
- Wide Product Range: We manage our product lines through the entire lifecycle, in order to offer you a wide selection of standard products at an affordable price.
- Global Presence: We're everywhere you need us, with worldwide sales, engineering support, R&D in North America, Europe, and Asia, and manufacturing facilities strategically located in the United States, Mexico, France, India, and China to provide on-demand cable assemblies.
- Responsive Support and Service: From the design stage, and planning to post-installation support, we're with you at every step, whether you need sales support or engineering expertise.
- Warranty: We stand behind our products.

Certifications and Environment

Radiall is ISO 9001:2008 certified and dedicated to continuous improvement programs that have resulted in AS9100, TS16949, and ISO 14001 certifications. In addition, Radiall is committed to investing in its people, future technologies, and the environment. Radiall is RoHS (Restriction of Hazardous Substances) and REACH (Registration, Evaluation, Authorization and Restriction of Chemical Substances) compliant.

The Best Manufacturing and Process Technologies

Our dedication to innovation and continuous improvement in leading-edge products means we excel in the techniques to create them:

- High precision machining: metal stamping, milling, turning, and cutting
- Molding, polishing
- Laser, ultrasonic, and vapor soldering
- Plating and plastic metallization
- Automatic assembly
- Characterization
- Test and measurement
- Cable and PTFE wrapping
- Thin and thick-film processes

Introduction

NON-MAGNETIC CONNECTOR FAMILIES

Radiall offers a growing range of non-magnetic connectors for medical, space, and other applications that includes MMCX, MCX, SMP, and SMB interfaces. To guarantee an exceptional non-magnetism level and repeatability, each non-magnetic connector is manufactured through a strictly controlled production process according to our quality assurance procedures.

For space applications, such as satellites used for scientific exploration, we offer an extensive range of SMA products, fully ESA qualified, meeting the residual magnetism required by the ESCC 3402 generic specification and the ESCC 3402/001, 002, and 003 detail specifications. Connectors are made of beryllium copper with gold plating and copper underplating.

NEW NON-MAGNETIC MCX SERIES

Radiall has expanded our range of non-magnetic connectors with the non-magnetic MCX series. These connectors meet the need for smaller interconnections in space-limited MRI equipment, such as those for head, shoulder, or foot. With more reliable connections through superior performance, the reinforced connection system eliminates the risk of perturbation in image quality.

The non-magnetic MCX family also includes a new full-detent cable version, which has been tested in high-vibration conditions, that eliminates intermittent connections. It complies with MIL-STD-202, Method 204, Condition D for vibration testing.

Non-magnetic MCX connectors are available in a wide range of configurations for:

- Board-to-board connections
- Cable-to-board connections
- Cable-to-cable connections

NON-MAGNETIC CABLE ASSEMBLIES

Radiall offers non-magnetic cable assemblies that provide a totally non-magnetic solution to reduce the risk of perturbation while working inside the B_0 magnetic field. Non-magnetic cables are available in RG/316, RG/178 flexible or .085" and .141" semi-rigid styles.

Introduction

CUSTOM PRODUCTS

We are continually developing new non-magnetic products, including high-density, multiposition configurations.

Multi-port connectors: We offer a wide variety of solutions for high-density coaxial contacts based on the standard SMP, Coaxipack 2, SMB and SMA ranges with additional multiple DC contacts. Our expertise and extensive knowledge in RF coaxial connector and cable assembly technology allows us to offer superior technical project support including those projects that need new coaxial connections developed. Multi-port connectors offer the advantage of having only one connector instead of several separate connectors to mate and unmate.

Non-magnetic RF CONNECTORS FOR MEDICAL

Non-magnetic coaxial connectors are used primarily inside MRI and other medical imaging equipment. Magnetic resonance imaging produces high-resolution cross-sectional images of the inside of the human body by exploiting radio frequency (RF) pulses. MRI technology has seen tremendous improvements in recent years with continued advances in technology, a small part of which is due to coaxial non-magnetic connectors.

MRI medical equipment consists of a large magnet or electromagnet to create an intense and homogenous magnetic field (0.3 to 7 T) that surrounds the patient, “gradient coils” to position the area under analysis, and two high-frequency coils. One coil transmits RF pulses of 20 to 300 MHz to excite the atomic nucleus in the area under analysis. The other coil receives a signal that constitutes the image after excitation. The output is sent to a computer for processing and display.

The quality of the picture depends mainly on the homogeneity of the magnetic field and on the signal-to-noise ratio. To avoid any interference in the field homogeneity, coaxial connectors and cables located in the magnetic field to connect the coils should be transparent relative to the field, which means their relative permittivity μ_r should be equal to 1.

High-quality non-magnetic connectors have extremely low magnetic susceptibility so that they are not magnetized by the fields created in the equipment.

Introduction

RADIAL NON-MAGNETIC CONNECTORS

Radiall connectors are specified for coils because they are manufactured with materials especially adapted to non-magnetism (with relative permittivity μ_r close to 1). Each rod of raw material is selected based on a direct measurement with a vibrant magnetometer, with the highest quality of surface plating such as BBR (Bright Bronze Radiall), or NPGR (gold plated over a non-magnetic nickel phosphorous).

Our non-magnetic connectors have a susceptibility of around 10^{-5} , as opposed to 10^{-2} for standard connectors made of brass/nickel materials. As a result, our non-magnetic connectors are transparent to the magnetic field, which means no field distortion, a higher SNR, and higher quality images.

Performance of Radiall non-magnetic RF connectors

Table of distortion comparison:

	Distortion at 10 mm $\Delta H/H_{\text{ext}}$ with $B_0=1.5$ Tesla	Magnetic susceptibility χ
Radiall non-magnetic connector	$\leq 5 \cdot 10^{-7}$	$\approx 10^{-5}$
Standard non-magnetic connector	$\approx 10^{-5}$	$\approx 10^{-3}$
Brass/nickel connector	$\approx 10^{-4}$	$\approx 10^{-2}$

The relative distortion of a magnetic field of 1.5 T, generated by Radiall non-magnetic connectors is only $5 \cdot 10^{-7}$ maximum, at a distance of 10 mm from the surface of the connector. Furthermore, they meet the electrical and mechanical characteristics required for any reliable coaxial connector. In addition, these connectors are extremely durable for medical applications.

Manufacturing

Manufacturing a Radiall non-magnetic connector involves a special “clean room” environment where all precautions are taken to avoid any contact with ferromagnetic materials during the machining and cleaning process. Radiall follows strict manufacturing guidelines through a quality assurance plan where documented rules are enforced throughout the production line. This quality assurance procedure guarantees the highest level of non-magnetism and repeatability for all Radiall non-magnetic connectors.

SECTION 17 TABLE OF CONTENTS

Joule effect soldering devices, tools and pointer gauge

JOULE EFFECT SOLDERING DEVICES

Compliant with European standards n° 89/336/CEE and 73/23/CEE (electromagnetic compatibility and low voltage). It allows to solder:

- Center contacts and bodies to semi-rigid cables
- Center contacts to flexible cables
- Solder pot receptacles

STRIPPING TOOL FOR SEMI-RIGID CABLE

This easy to use tool removes the cable's outer conductor and dielectric leaving the center conductor stripped to the proper length. It is supplied with a removal blade which can be ordered separately whenever required. Please specify P/N R282 055 000 when ordering the replacement blade, including adjustment gauge and male hex key.

Cable group	Cable group dia.	Part number

TIGHTENING TOOL

Part number
R282 202 000

A new universal plier helps facilitate the tightening of coupling nuts. The removable inserts are made of plastic in order to avoid damage on the knurling (for ≈ 130 Ncm).

Stripping tools

STRIPPING TOOL R299 520 000 FOR CABLE DIA. 2.5 TO 8mm (RG58, RG59, RG62) (includes standard cassette R299 522 000)

1) Dimension A in accordance with the plug stripping dimensions (not defined by the tool)

Part number	Designation	Stripping dimension
R299 520 000	Fixed-blade coaxial cable stripping tool for cable dia. 2.5 to 8.0 mm [.1" to .315"] Blades can be adjusted to precise cutting depths. Interchangeable blade cassette holders eliminate need to readjust blades	
R299 522 000	Adjustable blade, 2 or 3 stages	adjustable
R299 521 011	Replacement blade red, 2 stages	B = 6mm
R299 521 012	Replacement blade green, 3 stages	B = 5.1mm C = 7.1mm
R299 521 013	Replacement blade blue, 2 stages	B = 6.5mm
R299 521 014	Replacement blade yellow, 2 stages	B = 12mm
R299 521 015	Replacement blade grey, 2 stages	B = 3.9mm
R299 521 017	Replacement blade brown, 3 stages	B = 3.5mm C = 7.5mm

STRIPPING TOOL R299 550 000 FOR CABLE DIA. 2.5 TO 11mm

Part number	Designation
R299 550 000	Cable stripping range 2.5 to 11mm [.0984" to .4331"] Spring Tension - Squeeze to Open, Insert Cable & Rotate Around Jacket Delivers Smooth Consistent Strips. 9 Position Adjustable Depth Blade

KIT R299 510 010: STRIPPING TOOL FOR 2.5 TO 7.6mm DIA. FLEXIBLE CABLES (without cassette)

Part number	Designation
R299 510 010	STRIPPING TOOL 1 - Stripping tool 2 - White V guide for dia ext. cable 2.5 to 3 mm 3 - Red V guide for dia ext. cable 3 to 5 mm 4 - Blue V guide for dia ext. cable 5 to 6.4 mm 5 - Yellow V guide for dia ext. cable 6.4 to 7.6 mm 6 - Wrench 7 - Gauge

CASSETTES FOR R299 510 010

Part number	Designation	Length B (mm)	Length C (mm)
R299 511 013	Orange stripping cassette	3.5	6.5
R299 511 016	White stripping cassette	1.5	6.3
R299 511 011	Green stripping cassette	6.0	6.9
R299 511 012	Yellow stripping cassette	2.0	8.0

R282 124 075 (75Ω)	1x R282 223 000 Crimp tool for cable diameter 5 or 6 mm. Hex.: 1.73/5.41/6.48 15x R142 085 161 BNC male, straight, crimp for RG59 1x R299 520 000 Strip tool 1x R299 521 017 Replacement blade brown, 3 step for RG58, RG59

CRIMP TOOL R282 281 000 FOR CENTER CONTACTS

LOCATOR TOOL FOR CENTER CONTACT CRIMP TOOL R282 281 000

Part number	Note
R282 967 030	For pin contact for socket contact
R282 983 000	

Torque wrench

TORQUE WRENCH 4 TO 10mm

Part number	Across flats D (mm)	Coupling torque (N.cm)
R282 318 000	6 (.236)	30
R282 319 000	6.35 (.250)	60 to 80
R282 320 000	8 (.315)	80 to 120
R282 320 030		60
R282 320 031		70
R282 323 000	6.5 (.256)	80 to 120
TA-0456	8 (.315)	395 (35 lbf-in)
TA-0398	5.5 (.218)	34 (48 oz-in)
TA-0432	4.0 (.156)	21 (30 oz-in)
TA-0436	5.5 (.218)	68 (96 oz-in)

TORQUE WRENCH 10 TO 21 MM

Part number	Across flats D (mm)	Coupling torque (N.cm)
R282 300 000	14 (.550)	265
R282 303 020	18 (.710)	170
R282 303 000	19 (.748)	160
R282 303 010		130
R282 303 230	21 (.827)	400

TORQUE WRENCH 32 MM

Part number	Across flats D (mm)	Coupling torque (N.cm)
R282 303 500	32 (1.260)	3500

Insertion and extraction tools

EXTRACTION TOOLS FOR BMA & COAXIPACK 2

R282 918 160	1	SMP R222 15X XXX
R282 868 300	1	SMP-LOCK R222 LXX XXX
R282 918 210	1	SMPM R201 15X XXX

COAXIPACK 2 EXTRACTION TOOL

Part number
R282 920 120

HDC 43 INSERTION & EXTRACTION TOOL

Part number
R282 868 201

Extraction tools

UMP EXTRACTION TOOL

Photo 1

Photo 2

Part number	Photo	Note	To disconnect
R282 867 020	1	Axial disconnection	H2
R282 867 030	2	Lateral disconnection	H2, H2.6 & H3

This tool only applies to lock version. No tool needed for UMP snap of slide versions

MMS AND MMT EXTRACTION TOOL

Part number	Series
R282 868 040	MMT
R282 868 100	MMS

Materials and finish: black anodized aluminium. The anodization allows the electric insulation and protects from the oxidization.

MML EXTRACTION TOOLS

Part number	To disconnect	Packaging
R302 309 000	H2.5 & H2.0	Unit
R302 159 000	H1.5	

QMA EXTRACTION TOOL (optional for high density applications)

Part number
R282 868 230

This tool can be used with either straight or right angle connectors.

QRE EXTRACTION TOOL

Part number
TA-0457

This tool can be used with either straight or right angle connectors.

Extraction tools and sliding contacts

EXTRACTION TOOL FOR RIGHT ANGLE MCX AND MMBX CONNECTORS AND CAP MOUNTING

Part number	Flat dimension: inch (mm)
R282 868 000	.276 (7)

This tool has two functions
 - Fitting cover on right angle connectors
 - Extraction of these models after coupling

OPTIONAL SLIDING CONTACTS AND INSULATORS

Radiall cable groups

Example for flexible cables: 5/50 S	<ul style="list-style-type: none"> — Cable outer diameter in mm (2.6 mm, 5 mm, 10 mm, 11 mm,...) — Characteristic impedance (50Ω, 75Ω) — Number of shields (S=single, D=double)
Example for corrugated cables: 1/2 spiral	<ul style="list-style-type: none"> — Cable outer conductor diameter in fraction of inch (1/4", 3/8", 1/2",...)
Example for semi-rigid & handformable cables: .141"	<ul style="list-style-type: none"> — Cable outer conductor diameter in inches (.085", .141", .250",...)

Introduction

Radiall is globally recognized as a leading manufacturer of coaxial connectors, cable and cable assemblies.

Radiall has the best manufacturing technology and processes. As a result, we are one of the only manufacturers that have fully mastered foam PTFE wrapping technology. This capability enables us to supply cable assemblies featuring the highest level of performance, stability and repeatability.

In addition, Radiall has high precision stripping and cutting machines, soldering and cleaning equipment.

Radiall offers five standard ranges of cable for a wide variety of applications for the telecom, military, instrumentation, medical and broadcast markets.

Requirements for designing a custom cable-assembly

Start with identifying the needed components and the required information for your cable assembly:

- Coaxial cable (p/n or description)
- Connector 1 (p/n or description)
- Optional boot 1 or heatshrink sleeve 1 (p/n or description)
- Connector 2 (p/n or description)
- Optional boot or sleeve 2 (p/n or description)
- Length: radiall standard = overall length (or please specify if length between reference planes)
+ length tolerance (radiall standard = $\pm 2\%$)
- Marking: Radiall standard = RADIALL + p/n + batch code (or please specify if different)
- Connectors orientation (if needed for right-angle or panel connectors)

If you need a pigtail, you will also need the following dimensions and information:

- Stripping A dimension
- Stripping B dimension
- Stripping C dimension
- Tinned inner conductor (if needed)
- Tinned braid (if needed)

Specify the right cable for your application

Flexible cable 0.8/50 S (132390 type)

P/N: C291042 066

APPLICATION NOTE

The very small outer diameter and bending moment of this cable allow very easy routing during installation.

Its very light weight makes it perfect to be used in all miniature and space saving applications.

The insulation and jacket materials allow this cable to be used in severe thermal conditions.

Flexible cable 1/75 S (75 vmtx type)

P/N: C291055 076

APPLICATION NOTE

Due to its 75 ohms characteristic impedance, this cable is best suited for TV/Video applications. The very small outer diameter and bending moment allow very easy routing during installation. Its very light weight makes it perfect to be used in all miniature, space saving and dynamic applications. Suitable for severe thermal conditions.

⁽¹⁾ SPCCS = Silver Plated Copper covered steel

⁽²⁾ PTFE = PolyTetraFluoroEthylene

⁽³⁾ SPC = Silver Plated Copper

⁽⁴⁾ FEP = Fluorinated Ethylene Propylene

Note:

Typical attenuation for a couple of connectors (dB) = 0.045 x √f (GHz)

Flexible cable 2/50 S (RG178 - KX21A)

P/N: C291 145 007

(MIL-C-17/93-RG178)

P/N: C291 145 017

(NF-C-93/550-KX21A)

APPLICATION NOTE

Due to its small diameter and its stranded inner conductor, RG 178 / KX21A is used for applications requiring high flexibility.

Its very low bending moment allows an easy routing during installation.

The insulation and jacket materials allow this cable to be used in severe thermal conditions.

CONSTRUCTION / DIMENSIONS

⁽³⁾ SPC = Silver Plated Copper

⁽⁴⁾ FEP = Fluorinated Ethylene Propylene

Flexible cable 2/50 S (non magnetic RG178 type)

P/N: C291 140 087
(MIL-C-17/93-RG178)

APPLICATION NOTE

Based on MIL-C17/93 US standard, this cable is used where non magnetic is required.
In addition the solid inner conductor allows reduced attenuation in comparison with standard RG178.
The insulation and jacket materials allow this cable to be used in severe thermal conditions.

Note:
Typical attenuation for a couple of connectors (dB) = 0.045 x √f (GHz)

Flexible cable 2/50 D (124416 type)

P/N: C291 146 087

APPLICATION NOTE

Due to its small diameter this cable will be used for applications requiring flexibility.
Its low bending moment allows an easy routing during installation.
The double braid provides a higher level of shielding in comparison with 2mm single braided cables.
In addition the solid inner conductor provides a very good attenuation level.
The insulation and jacket materials allow this cable to be used in severe thermal conditions.

(MIL-C-17/128-RG400)**

APPLICATION NOTE

Due to its stranded inner conductor, RG 400 is much more flexible than RG142 and RG223. This cable can be used instead of equivalent RG's for specific applications requiring high flexibility. Suitable for severe thermal conditions.

CONSTRUCTION / DIMENSIONS

	Material	mm	Inches

Flexible cable 2.6/50 S (ECO316: alternative to RG316)

P/N: C291 999 904

APPLICATION NOTE

Designed by RADIALL, ECO316 is an advantageous alternative solution to RG316:

- **Advantageous in term of electrical performance:** its optimized construction allows better attenuation and screening effectiveness than RG316 and RG 174.
- **Environmental advantages:** halogen and sulphur free, this cable does not emit any toxic substance when submitted to fire. The flame retardant jacket allows ECO316 to meet fire resistance standards.
- **Advantageous in term of price:** ECO316 design has integrated all Radiall knowledge to reach the best performance with a very competitive price. ECO316 is UL style 1375 approved. **This cable is compatible with a large range of connector series.**

ECO-Friendly cable
Cost effective solution

Flexible cable 2.6/50 S (ECO316X)

ECO-Friendly cable
Cost effective solution

P/N: C291 171 083

APPLICATION NOTE

Designed by Radiall, ECO316X is an alternative solution to ECO316 when higher power level is required:

- **Advantageous in term of electrical performance:** the crosslink foam polyethylene used as dielectric material allows higher temperature level (thus power range) than ECO316.
 - **Environmental advantages:** halogen and sulphur free, this cable does not emit any toxic substance when submitted to fire. The flame retardant jacket allows ECO316X to meet fire resistance standards.
 - **Advantageous in term of price:** ECO316X design has integrated all Radiall knowledge to reach the best performance with a very competitive price.
- ECO316X is UL style 1375 and 3651 approved
This cable is compatible with a large range of standard connector series.

Flexible cable 2.6/50 D (ECO316D: alternative to RD316)

ECO-Friendly cable
Cost effective solution

P/N: C291 999 905

APPLICATION NOTE

Designed by Radiall, ECO316D is an alternative solution to RD316:

- **Advantageous in term of electrical performance:** its optimized construction allows better attenuation and screening effectiveness than RD316.
 - **Environmental advantages:** halogen and sulphur free, this cable does not emit any toxic substance when submitted to fire. The flame retardant jacket allows ECO316D to meet fire resistance standards.
 - **Advantageous in term of price:** ECO316D design has integrated all Radiall knowledge to reach the best performance with a very competitive price.
- ECO316D is UL style 1375 approved.
This cable is compatible with a large range of connector series.

Corrugated cable 1/4" (Cellflex 1/4" Spiral)

P/N: C291 993 170

(Cellflex HCF 1/4" - 50 AlCu)

APPLICATION NOTE

The outer conductor of this cable is made up of a corrugated tube (spiral winding). This construction allows perfect shielding and bendability while enabling a large bending radius. The foam dielectric provides excellent loss and low return loss levels. This cable will be advised for feeder and jumper assemblies in cellular networks as well as applications requiring high performance level on long distances. The anti-UV LSZH (Low Smoke Zero Halogen) material is also flame retardant and allows this cable to be used for indoor public areas as well as outdoor installations.

Corrugated cable 3/8" (Cellflex 3/8" Spiral)

P/N: C291 996 170 (Cellflex HCF 3/8" CuH-50 AlCu)

APPLICATION NOTE

The outer conductor of this cable is made up of a corrugated tube (spiral winding). This construction allows perfect shielding and bendability while enabling large bending radius. The foam dielectric provides excellent loss and low return loss levels. This cable is suitable for feeder and jumper assemblies in cellular networks as well as applications requiring high performance level on long distances. The anti-UV LSZH (Low Smoke Zero Halogen) material is also flame retardant and allows this cable to be used for indoor public areas as well as outdoor installations.

Note:
 Typical attenuation for a couple of connectors (dB) = 0.045 x √f (GHz)

Corrugated cable 1/2" (Cellflex 1/2" Spiral)

P/N: C291 994 170 (Cellflex HCF 1/2" CuH-50 AlCu)

APPLICATION NOTE

The outer conductor of this cable is made up of a corrugated tube (spiral winding). This construction allows perfect shielding and bendability while enabling large bending radius. The foam dielectric provides excellent loss and low return loss levels. This cable will be advised for feeder and jumper assemblies in cellular networks as well as applications requiring high performance level on long distances. The anti-UV LSZH (Low Smoke Zero Halogen) material is also flame retardant and allows this cable to be used for indoor public areas as well as outdoor installations.

Semi-rigid cable .047 (Tinned copper)

P/N: C291 855 065 (MIL-C-17/151-00002 TYPE)

APPLICATION NOTE

This is the smallest semi-rigid cable size available at Radiall.
Its reduced size allows it to be easily handformable during integration operations.
Due to the outer conductor coating (tin), this cable will be used instead of standard .047 copper for applications requiring high corrosion resistance and improved solderability.

Hand-formable cable .085 (unjacketed)

P/N: C291 844 065

APPLICATION NOTE

This handformable cable is the perfect alternative to RG405 for applications requiring an easy routing on equipment. Due to the outer conductor construction, this cable can be hand formed with exceptional ease with no spring back effect. Cable can be reshaped, eliminating the need for costly drawings. Attenuation is a little bit higher than RG405 but temperature range is wider.

Semi-rigid cable .085 (RG405 - KS1)

**P/N: C291 850 001
(MIL-C-17/133-RG405)
(NF-C-93/551-KS1)**

APPLICATION NOTE

RG405 is one of the most popular semi-rigid RG cables. RG405 is a more preferred option to flexible RG316 or RD316 for applications requiring high frequency range, low attenuation, high screening effectiveness, very small bending radius and/or no spring back effect.

Semi-rigid cable .085 (Aluminum)

P/N: C291 844 187
(MIL-C-17/133-00013)

APPLICATION NOTE

Based on RG405 standard, this cable will be selected for application requiring easy conformability and/or application requiring reduced weight.
 Due to the aluminum outer conductor, this cable can be hand formed with exceptional ease with no spring back effect.
 The cable can be reshaped, eliminating the need for costly drawings.
 The outer conductor material (aluminum) slightly increases the attenuation compared to standard RG405.

P/N: C291 866 378

APPLICATION NOTE

This jacketed cable will be used instead of standard unjacketed .141 for applications requiring electrical insulation and/or protection against environmental aggressions (chemical, humidity...).

The FEP jacket allows this cable to be used under severe thermal conditions.

The jacket slightly increases the spring back effect.

CONSTRUCTION / DIMENSIONS

	Material	mm	Inches
Center conductor	Solid SPC ⁽¹⁾	0.92	0.036
Dielectric	Solid PTFE ⁽²⁾	2.98	0.117
Inner shield	TS ⁽³⁾ braid	3.50	0.138
Outer shield	-	-	-
Jacket	Black FEP ⁽⁴⁾	4.05	0.159

ELECTRICAL CHARACTERISTICS

Characteristic impedance	50Ω ± 2Ω	
Operating frequency range	DC - 20 GHz	
Shielding effectiveness	90 dB	
Voltage withstanding	5 000 V rms	
Peak power	3.4 kW	
Capacitance	97.5 pF / m	29.5 pF / ft
Velocity of propagation	70 % (4.8 ns / m)	

MECHANICAL CHARACTERISTICS

Recommended minimum bending radius	11 ⁽⁵⁾ / 33 ⁽⁶⁾ mm	0.43 ⁽⁵⁾ / 1.3 ⁽⁶⁾ inch
Weight	38 g / m	0.0254 lbs / ft

ENVIRONMENTAL CHARACTERISTICS

Operating temperature range	-65 / +150 °C	-85 / +302 °F
Fire resistance	yes (CSA FT6 / IEC 332-2)	
Halogen free	no

Typical attenuation for a couple of connectors (dB) = 0.045 x √f (GHz)

Semi-rigid cable .141 (RG402 - KS2)

P/N: C291 860 001

(MIL-C-17/130-RG402)

(NF-C-93/551-KS2)

APPLICATION NOTE

RG402 is one of the most popular semi-rigid RG cables.

RG402 will be preferred to flexible RG142 for applications requiring high frequency range, low attenuation, high screening effectiveness, very small bending radius and/or no spring back effect.

CONSTRUCTION / DIMENSIONS

Semi-rigid cable .141 (Tinned copper)

**P/N: C291 862 005
(MIL-C-17/130-00005)**

APPLICATION NOTE

Due to the outer conductor coating (tin), this cable will be used instead of RG402 for applications requiring high corrosion resistance and improved solderability. This cable is also an economical alternative to .141 silvered copper.

Note:

Typical attenuation for a couple of connectors (dB) = 0.045 x √f (GHz)

Semi-rigid cable .141 (Silvered copper)

P/N: C291 861 066

APPLICATION NOTE

Based on RG402 standard, this cable is used where non magnetic is required.

In addition, due to the outer conductor coating (silver), this cable will be used instead of RG402 for applications requiring high corrosion resistance and improved solderability.

Semi-rigid cable .141 (Aluminum)

P/N: C291 864 187

(MIL-C-17/130-00009)

APPLICATION NOTE

Based on RG402 standard, this cable will be selected for application requiring easy conformability and/or application requiring reduced weight.

Due to the aluminum outer conductor, this cable can be hand formed with exceptional ease with no spring back effect.

Cable can be reshaped, eliminating the need for costly drawings. The outer conductor material (aluminum) slightly increases the attenuation compared to standard RG402.

**Low loss Flexible cable 5/50 S+F
(AEP-200FR alternative to LMR-200FR®)**

P/N: C291 327 020

APPLICATION NOTE

AEP-200FR cable is an alternative solution to 50 Ohms LMR-200FR® cable offering the same performance and similar construction with cost advantage.

REGULATIONS

RoHS compliant
UL/NEC: CMR
UL/CSA: FT4

**CONNECTORS COMPATIBLE
WITH AEP-200FR
(and to LMR® 200FR)**

Connectors

The unique design of SHF cables allows for the use of custom-designed connectors. At Radiall, we pay particular attention to the design and to termination techniques to ensure low VSWR and superior cable performance.

Our cable /connector terminations are designed to maintain shield integrity into the lowest leakage attainable in a flexible assembly. All electrical connections (center contact and inner tape shield) are soldered.

Most popular connector interfaces to fit SHF cable are SMPM, SMP, SSMA, SMA, QRE, TNC, and N Type.

SHF cable range

Ultra low loss flexible cable

Cable	VP	Max Dia.	Attenuation	Bending radius	Weight

⁽²⁾ Triple shield structure

⁽¹⁾ SPC: Silver Plated Copper

SHF cable range

Stranded Inner Conductor Cable

Using stranded center conductor allow better flexibility while keeping good IL performance level.

Longer flex life
SHF3, SHF5, SHF8

Ultra Flexible Cable

Unique design of center conductor as well as braiding and jacketing provide a unique flexibility behavior to SHF UF.

Low bending moment
Up to 1 million flexures
SHF2.2UF, SHF3UF, SHF5UF

Heavy Duty Protective Jacket

Projack provides the highest mechanical protection to SHF cables. Despite this high protection level, Projack maintains the same level of flexibility as the original cable.

Crush resistant 2500N/10cm
UV resistant
Watertightness

A/10 Armored Cable

In many customer applications, mechanical stress may damage cable assemblies. Radiall has designed several levels of armored structures embedding SHF core lines.

Crush resistant
1000N/10cm
Abrasion resistant
SHF5MA/10, SHF8MA/10

OD Outdoor Cable

Designed for outdoor environments, Radiall's outdoor cables are typically used for Ground Radars and Navy systems.

UV resistant
Watertightness
SHF5OD, SHF5MOD
SHF8OD, SHF8MOD

LW-2 Light Weight Cable

Radiall's Lightweight range is the best choice for on-board equipment, where weight and density are critical.

30% weight saving
SHF5MLW-2, SHF8MLW-2

AF-2 Air Frame Cable

SHF AirFrame cables: Robustness for extended life in extreme condition. Radiall's AirFrame cables are used in non-pressurized or not-protected areas.

Hermetically sealed
15 Km (50,000 ft) - 150°C
Fluid resistant
SHF5MAF-2, SHF8MAF-2

Ultra low loss SHF cable range

TERMINATIONS

Introduction..... 19-4
Low power terminations, up to 3 watts 19-5 to 19-7
Medium power terminations, up to 30 watts 19-7 to 19-8
High power terminations, up to 1000 watts 19-8 to 19-9
Platinum terminations, up to 1 Watt 19-10

ATTENUATORS

Introduction..... 19-10
Low power attenuators, up to 2 watts 19-11 to 19-13
Medium power attenuators, up to 30 watts 19-14
High power attenuators, up to 100 watts 19-5 to 19-16
Platinum attenuators, up to 2 Watts 19-17

COUPLERS & SPECIAL DEVICES

Introduction..... 19-17
Couplers 19-18 to 19-19
Special devices 19-20 to 19-21

INDEX 19-22

Introduction

Radiall coaxial terminations offer excellent reliability and repeatability from DC to 50 GHz. The offer includes low, medium, high power terminations, and a platinum range for instrumentation applications which provide the lowest VSWR.

Here are the main features of Radiall's terminations:

- Power range from 0.5W to 1000W
- Frequency from DC up to 50 GHz
- 50Ω Impedance
- High repeatability
- Compatibility with all standard connector interfaces
- Connector interface according to applicable MIL, DIN, NF and CEI
- Dedicated Platinum range for Test & Measurement providing lowest VSWR

LOW POWER TERMINATIONS

Power	0.5 to 3 Watts
Connectors	BMA, BNC, QMA, QN, N, SMA, SMA2.9, SMB, SMP, SSMA, TNC, 1.0/2.3
Frequency range	DC to 50 GHz

MEDIUM POWER TERMINATIONS

Power	6 to 30 Watts
Connectors	BNC, N, SMA, TNC, 7/16
Frequency range	DC to 18 GHz

HIGH POWER TERMINATIONS

Power	50 to 1000 Watts
Connectors	N, SMA, TNC, 7/16
Frequency range	DC to 6 GHz

PLATINUM TERMINATIONS

Radiall's low power terminations offer is dedicated for Test & Measurement and provides the lowest VSWR.

Power	1 Watt
Connectors	SMA2.9, SMA3.5, SMA, N, BNC, TNC
Frequency	DC to 40 GHz

Our Most Important Connection is with You.™

TERMINATIONS

Low power terminations, up to 3 watts

1.0/2.3 - 50 OHMS

Frequency DC to (GHz)	VSWR max.	Return loss min. (dB)	Power rating (W)		Impedance (Ω)	Gender	Part Number

Platinum terminations, up to 1 watt

Radiall's platinum series of terminations is designed for test & measurement applications. This range can be easily integrated in communication matrices, test benches and laboratories where high RF performance and reliability are essential.

Here are the main features of Radiall's platinum series of terminations:

- 1 W power rating
- Frequency from DC up to 40 GHz
- Lowest VSWR
- 50Ω Impedance
- Compatibility with all standards Test & Measurement interfaces
- Full integration in Radiall Test & Measurement offer:
Electro-mechanical switches & Testpro cable Assemblies

Introduction

Radiall coaxial fixed attenuators offer excellent reliability and repeatability from DC to 40 GHz. The offer includes low, medium, high power attenuators and a platinum range for instrumentation applications which provide the lowest VSWR.

Here are the main features of Radiall's attenuators:

- Power range from 0.5W to 100W
- Frequency from DC up to 40 GHz
- Attenuation values from 0 up to 60 dB
- High repeatability
- 50Ω Impedance
- Compatibility with all standard connectors interfaces: BNC, QN, N, 7/16, SMA, TNC, SMA2.9
- Dedicated Platinum range for Test & Measurement providing lowest VSWR

LOW POWER ATTENUATORS

Power	0.5 to 2 Watts
Connectors	BNC, QN, N, SMA, SMA2.9, SMB, TNC, 7/16
Frequency range	DC to 40 GHz
Attenuation range	0 to 60 dB

MEDIUM POWER ATTENUATORS

Power	3 to 50 Watts
Connectors	BNC, N, SMA, TNC, 7/16
Frequency range	DC to 18 GHz
Attenuation range	0 to 30 dB

HIGH POWER ATTENUATORS

Power	80 to 100 Watts
Connectors	N, SMA, TNC, 7/16
Frequency range	DC to 6 GHz
Attenuation range	0 to 20 dB

PLATINUM ATTENUATORS

Radiall's low power attenuator offer is dedicated for Test & Measurement and provides the lowest VSWR.

Power	2 Watts
Connectors	SMA2.9, SMA3.5, SMA, N, BNC, TNC
Frequency range	DC to 40 GHz
Attenuation range	0 to 30 dB

Low power attenuators, up to 2 watts

7/16 - 50 OHMS, MALE TO FEMALE

Platinum attenuators, up to 2 watts

Radiall's platinum series of attenuators are designed for test & measurement applications. This range can be easily integrated in communication matrices, test benches and laboratories where high RF performance and reliability are essential.

Here are the main features of Radiall's platinum series of terminations:

- 2W power rating
- Frequency from DC up to 40 GHz
- 50Ω Impedance
- Attenuation value from 0 to 30 dB
- Lowest VSWR for test applications
- Compatibility with all standards Test & Measurement interfaces
- Connector interface according to applicable MIL, DIN, NF and CEI
- Full integration in Radiall Test & Measurement offer: Electro-mechanical switches & TestPro cable Assemblies

SMA2.9 - 50 OHMS, MALE TO FEMALE

Available attenuation value: xx = 03, 06, 10, 20, 30 dB							

Introduction

COAXIAL COUPLERS

3dB hybrid couplers and directional couplers are passive devices used in the microwave field. A directional coupler is a reciprocal 4 port device. When a signal is applied to its input port, it provides 2 amplitude ports, coupling is the ratio in dB of the incident power fed into the input port of the main line of the directional coupler to the coupled port of the secondary line when all ports are terminated on matched load. A 3dB Hybrid coupler is a special class of directional couplers in which signals at the two outputs are equal to split RF signal in 2 equal parts or to combine 2 RF signals on one port.

Directional couplers and power dividers have many applications, these include; providing a signal sample for measurement or monitoring, feedback, combining feeds to and from antennas, antenna beam forming.

SPECIAL DEVICES

Feed through terminations

These components are used to properly terminate a transmission line while testing with a high impedance measuring system such as an oscilloscope input.

Detectors

A detector is a 2 port device capable of supplying a low frequency signal on its output port (video), of a level proportional of the RF power applied to its input port. This proportionality is achieved by means of non linearity property of the diodes used which at low level supply a detected voltage proportional to the RF voltage.

Rotary joints

These components provide the transition between two coaxial transmission lines rotating with respect to each other while retaining acceptable RF characteristics.

DC blocks

DC blocks are composed of a capacitor inserted to the the central conductor of the coaxial line. They block any DC or low frequency current present on the line.

Signal samplers

These devices are used to sample part of an RF signal from a coaxial line. They are not directive, and sample incident and reflected energy.

Phase shifters

These components create a mechanically adjustable phase shift by variation in the physical length of the transmission line.

Our Most Important Connection is with You.™

Couplers

Introduction

Radiall offers a wide selection of high quality and reliable professional banana plugs for the most demanding test and measurement applications.

Radiall's professional banana plugs consist of two major series and adapters:

The 4mm Series

- Safety plugs and sockets
- Safety patch cords
- Standard plugs and sockets
- Standard patch cords
- Accessories

The 2mm Series

- Plugs and sockets
- Patch cords
- PCB test points
- 20-way fixed connector
- Short circuit links
- Contact block and ribbon patch cords
- Accessories

Adapters

- 2mm/4mm banana adapter
- BNC/2mm banana adapter
- BNC/4mm banana adapter
- Banana adapter patch cord
- Coaxial banana adapter patch cord

Applications

- Research institutes and laboratories
- Education
- Instrumentations
- Low voltage
- Electronics
- Engineering

Introduction

FEATURES AND BENEFITS

Radiall's in-house technologies ensure high reliable product solutions due to its expertise and advanced design technology.

Radiall's contacts consists of a monobloc pin fitted with a copper beryllium spring finger. Depending on the model, the pin may or may not have a protective sleeve.

	4mm series	2mm series
Contact resistance	0.5 mΩ	1mΩ
Current rating, max @ 20 ° C	30 A	10 A
Contact durability, min.	10,000 mating cycles	

Benefits

- Excellent electrical conduction
- Very low contact resistance
- Robust contact point pressure when connected
- High durability for high number of mating cycles

GLOSSARY OF ABBREVIATIONS

Introduction

4mm SAFETY SERIES

Due to safety being an important criteria when using test and measurement instrumentation, especially for high voltage use, Radiall developed the 4mm Safety Series, which offers an improved protection system that eliminates all risk of contact with live elements when handling components.

Safety connectors are reinforced by a protective sleeve and an insulation cap on the top of the contact. The protective sleeve may be retractable or non-retractable. All plugs with non-retractable sleeves are rated at 600V, CAT III or 1000V, CAT II according to the safety standard IEC 61010-031 version 2002.

4mm STANDARD SERIES

The 4mm Standard Series meets the requirements of NF C 93 440 standards. The product in this series are not intended for hand-held use at voltage above 30Vac/60Vdc.

Example of a regular connection: the contact is exposed.

ACCESSORIES: TEST CLIPS

- With sliding hook: The contact hook guarantees a good grip on wires, components and PCB pin up to 1.5mm² thick.
- Alligator Test Clips: Features a large opening and gripping efficiency for use on motors, fuse holders, terminals, etc.
- Flexible Steel Rod Test Clips: The thin flexible steel rod allows testing of hard-to-reach points in dense circuitry.
- Crocodile Test Clips: Features a large 20mm opening to allow attachment to larger test points.
- Safety Test Probe: An extra thin probe allows contact through coatings and some insulations. It can also be used for PCB measurements. Fitted with a rear-mounted 4mm socket, it can be used with BM patch cords.

Introduction

Radiall's high-quality and reliable 2mm Series are designed for high-density test and measurement applications. This series includes a wide range of plugs, sockets, patch cords, test accessories, multiway connectors, short-circuit link, and other configurations.

- Plugs
- Sockets
- Patch cords
- PCB test points
- 20-way fixed connector
- Short circuit links
- Contact block and ribbon patch cords
- Accessories

20-WAY FIXED CONNECTORS

These connectors contain twenty 2mm sockets molded into a low-profile housing. The tight pitch between sockets makes them particularly suitable for use in circuit breakers and test batteries.

ADVANTAGES:

- Quick assembly time with single mounting operation for multi-connections
- Space savings
- Simplified panel piercing
- Orientation of solder shafts

Has the potential to be able to remove the cable harness without disconnecting each socket.

SHORT-CIRCUIT U LINKS

The short-circuit U link is a complementary component to the 20-way fixed connector and can be used to make shunts. It is fitted with a rear-mounted 2mm socket.

Introduction

2mm CONTACT BLOCKS AND RIBBON PATCH CORDS SERIES

This series includes: contact blocks and ribbon patch cords.

Dimensions of contact outlets and projections.

RIBBON PATCH CORDS

The contact blocks can mate with ribbon patch cords, which have:

- Excellent contact
- Sturdy construction
- Contact polarization options
- Low bulk
- High retention

They can be used for several field applications such as: electronics, laboratories, education and telecommunications, etc.

ACCESSORIES PCB TEST SOCKET

Test sockets simplify testing and maintenance of equipment where direct contact with components should be avoided.

- **Test Socket entrax 10.16mm:** This model, with the particular disposition of the pins, allows the unmobilization on the circuit board. This version is particularly adapted for a wave soldering operation.
- **Test Socket entrax 5.08mm:** This test socket is made up of a joined spiral spring with a nickel over plated protection.

ACCESSORIES TEST PROBE

An extra thin probe allows contact through coatings and some insulations. It can also be used for PCB measurements. They are fitted with a rear-mounted 2mm socket and can be used with BLM and BLDM patch cords.

Patch cords

Except where specified, all patch cords lengths are defined by the length of the cable without connectors or strain relief.

Radiall Patch Cord Series includes:

- **BLM**: Molded miniature extension patch cords
- **BLDM**: Molded miniature stackable patch cords
- **Patch cords made-to-order**

Each plug is soldered onto the cable in order to assure an excellent electrical connection with very stable transfer resistance.

Introduction

The connection may be attached to a coaxial line. You will find at the end of the catalog the adapters which allow connecting between 2mm and 4mm or between BNC coaxial connectors with banana plugs for both 2mm and 4mm connectors.

Characteristics

	2mm / 4mm Adapter	BNC / 2mm Adapter	BNC / 4mm Adapter	Adapter Patch Cords

COAXIAL PATCH CORDS/4mm BANANA PLUG

BCX COAXIAL PATCH CORDS

The BCX coaxial cords are normally connected to the terminals of measuring devices in order to uncouple the central core from the braid of a coaxial cable. The BCX plug is non-removable. The cable core is soldered to the center contact and the braid is soldered to the socket.

Our most
important
connection
is with you.™

It's not just a slogan. It's a statement of our earnest desire to put you at the forefront of all our business practices. As part of Radiall's mission to be available and accessible, we make it a priority to have local offices around the globe ready and able to assist you – wherever you are, whenever you need us.
